OneSpace

Open for Trade. Closed to Risk.

OneSpace gives centre management one system for the retail sites they run. Keep tenants and staff linked to the right units, control staff, contractor and delivery access, and put SNIPR alerts in front of the control room and the patrol. Incidents are recorded properly and reported without a scatter of groups and spreadsheets.

The result is coordinated operations across every centre in the portfolio. Tenants get a simple **Connect App**. Management gets people, visitor and security data in one place. **InSights** turns that into live dashboards, so known people and vehicles stay distinct from unknowns and risk is managed across all sites.

SECURE ACCESS

Give tenants and authorised staff fast entry with the Connect App. Handle contractors and deliveries with visitor passes and GateBook in parking and loading lanes, while centre management keeps the record.

STAY INFORMED

OneSpace Central carries incidents and targeted updates to tenants. SNIPR puts vehicle and camera alerts in front of the control room and the patrol. Management sees concise reports, not a live tactical feed they are expected to answer.

ONE SYSTEM

People, units, access, visitors and incidents sit in Central. SNIPR watches the roads and parking approaches. InSights combines that data across every retail site you run, so operators brief from one view and risk is managed across the portfolio.

Tenant App Panic Button

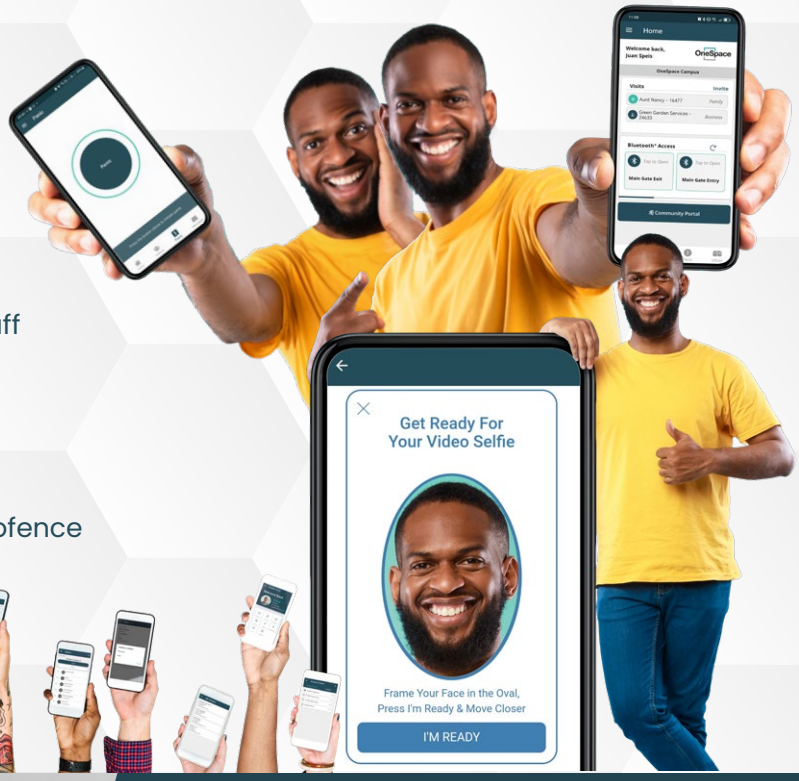

OneSpace Connect App

Give every tenant and authorised staff member a single, professional app from day one.

New people are onboarded quickly and can immediately use access methods, invite visitors, receive site notifications, manage their own details and access a nationally supported panic button. The experience feels modern and convenient, while centre management retains full control through OneSpace Central.

One app for access, visitors, communication and self-management, ready the moment they are linked to the centre.

- Bluetooth® access ready to use from day one
- Manage all access methods from a single app
- Fast onboarding for new tenants
- Invite visitors directly from the app
- Receive real-time notifications and alerts
- Self-manage vehicles, personal details and staff
- Report incidents with location data and photos
- View personal access and visitor activity
- All administered and controlled from Central
- Nationally supported panic button with site geofence routing and national backup when off site

1iD One secure digital identity for every person.

The account system that powers the entire OneSpace ecosystem, giving each individual a single, protected profile that travels with them. Fully POPIA compliant, it puts Data Subject information controls firmly in the hands of the user while still allowing managers the oversight they need.

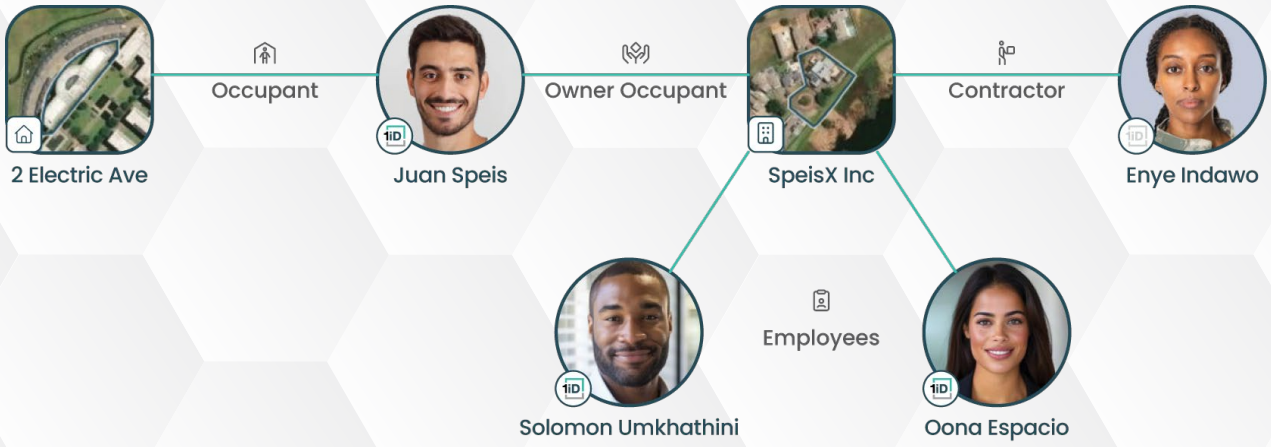

One account. One system. Complete control.

People Management

Property Management

Complete visibility of every property and every person

OneSpace Central gives centre management a single, clear view of every unit, every tenant and every person linked to the centre.

See every unit, every tenant and every person linked to the centre in one clear view. Understand exactly who belongs where, who has permission to enter, and how long those permissions remain valid.

Manage the site record and the rest follows automatically within the OneSpace ecosystem. Tenants and staff stay correctly linked to the right units, while outdated access is controlled through simple validity dates.

The result is cleaner data, faster decisions and tighter operational control.

Complete Visibility

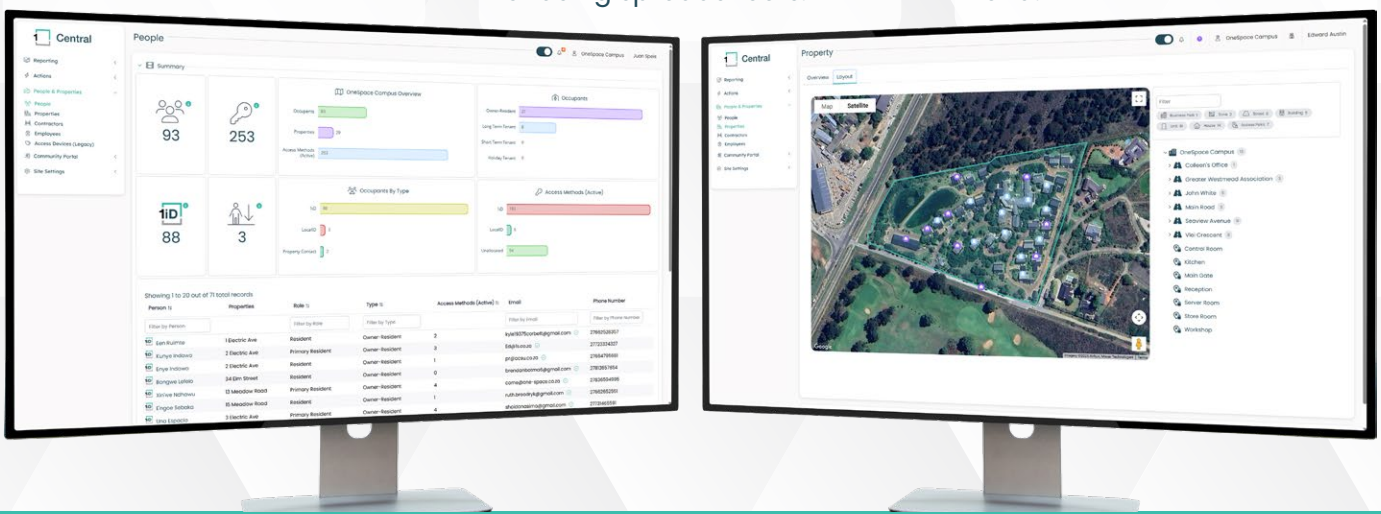

See every property and every person linked to the centre in one clear view.

Accurate Records

Keep ownership, occupancy and access rights current without chasing spreadsheets.

Controlled Validity

Validity dates automatically manage when permissions start and end.

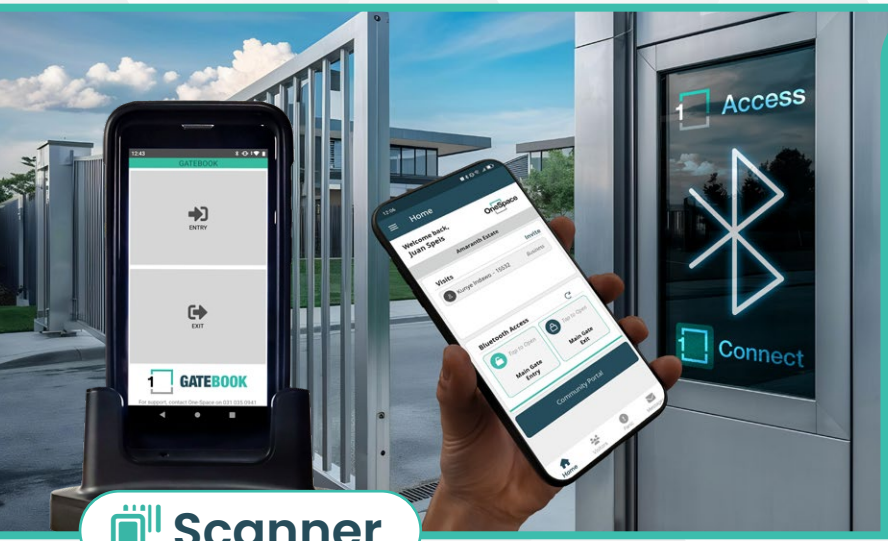

Access Control

OneAccess

Give authorised people convenient, controlled access while centre management retains full oversight.

Flexible access methods work at staff, contractor and delivery points, and managers set exact rights, times and locations from **Central**. The result is smooth movement for authorised people and clear records of every entry and exit.

- Bluetooth® Access
- Face Biometric Access
- Card & Tag Access
- Codehopping Remote Access
- ANPR Access
- Managers control times, days and locations for each method
- Seamless entry for authorised people
- Full access reports and history in Central
- Works as part of the single system solution

Scanner

Visitor Management

Reception Kiosk

Know exactly who is on site and why they are there, whether they arrive invited or as walk-ins. Visitors can be invited in advance with PIN or QR access, or processed on arrival at the staff entrance or reception using **GateBook**. The system is highly flexible, allowing visitor passes to be limited by number of uses, by validity dates, or by both.

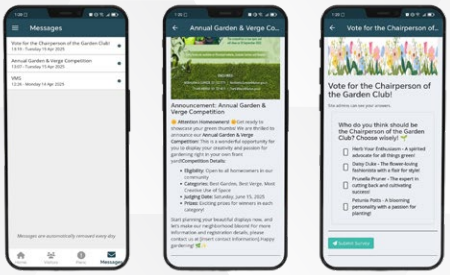

- Invite visitors with PIN or QR codes for keypad or **GateBook** entry
- Process walk-in visitors at the gate with **GateBook**
- Process walk-in visitors in reception with **GateBook for Reception**
- Create visitor passes limited by uses, dates, or both
- Capture visitor and vehicle details with clear host links
- Track entries, exits and current visitors

Communications

Keep everyone informed without relying on scattered WhatsApp groups or emails. Managers send targeted messages from **Central** to individuals, units or groups. Recipients receive them directly in **Connect App**, creating clear, traceable communication across the centre.

- Send announcements and updates from **Central**
- Target specific people, units, groups or custom sendlists
- Messages delivered optionally to **Connect App** and email

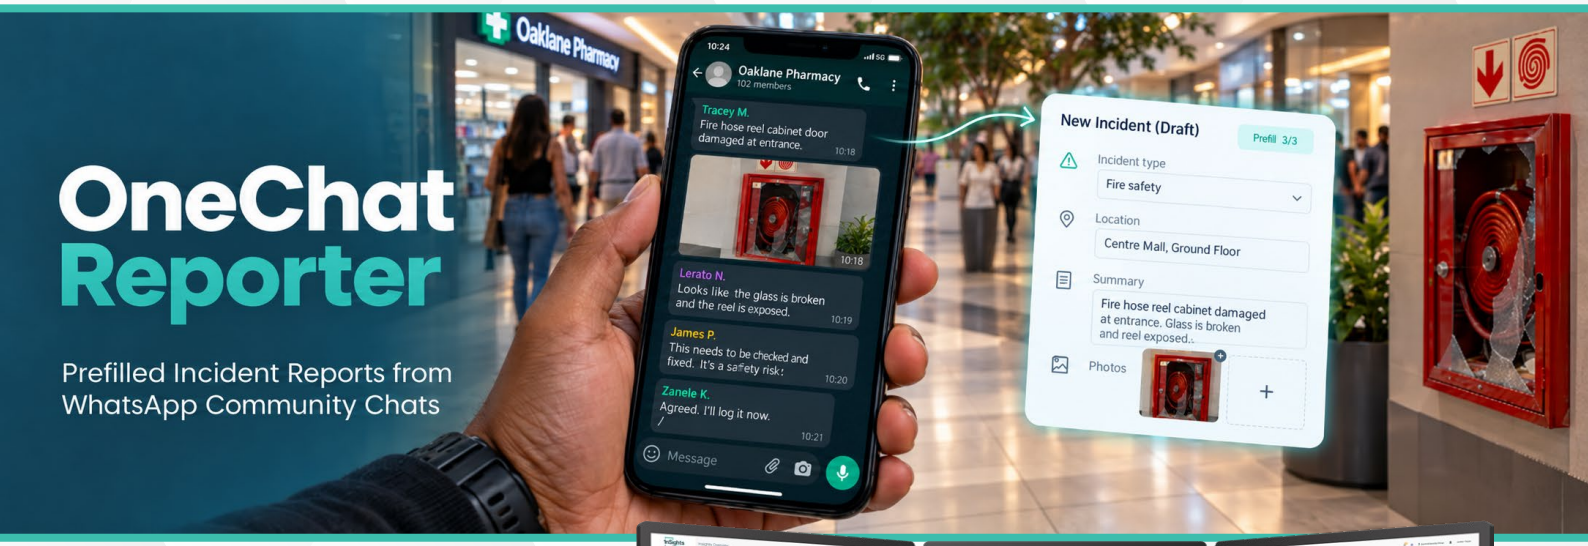

Incident Management

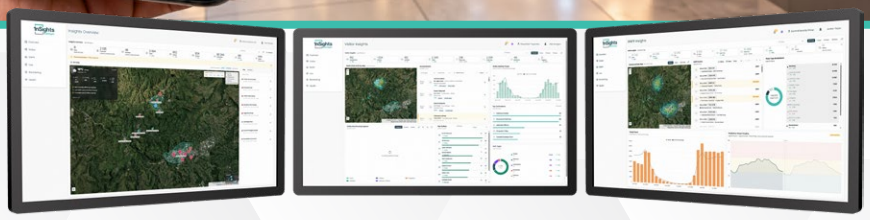

Capture and manage incidents properly from the moment they happen. Tenants report incidents from the **Connect App** with location data and photos. Managers review, update and close them in **Central**, creating a clear record for the centre.

- Report incidents with location and photos
- Manage and track incidents in **Central**
- Geo-tagged records for better oversight

Security Control

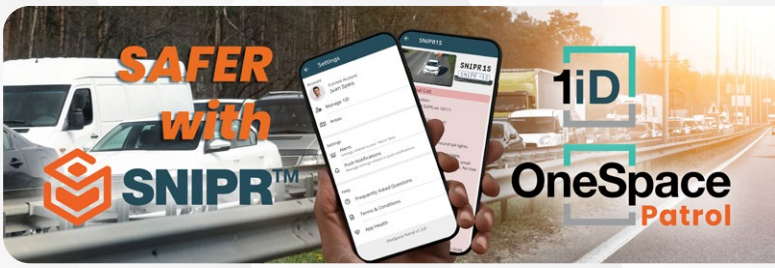

Give your control room a clear, live view of what is happening across the centre, parking and surrounding roads. **SNIPR.Online** delivers real-time alerts, detection details and heatmaps so operators can respond quickly and with full context.

- Live alert dashboard for ANPR, object recognition and facial recognition
- Detailed alert history and vehicle of interest information
- Heatmaps showing movement patterns
- Device health monitoring for cameras and network

Security App

Put the same powerful alerts into the hands of your response teams.
The **OneSpace Patrol app** delivers **SNIPR** alerts directly to patrollers and security personnel in the field, so they can act immediately.

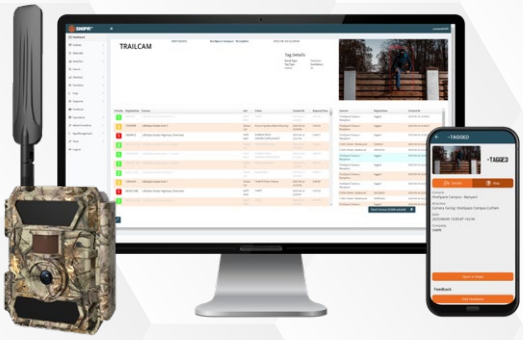

- Real-time alerts on mobile devices
- Visual confirmation and vehicle details
- Designed for in-field response teams
- Works alongside **SNIPR.Online**

Trail Cameras

Extend reliable surveillance to perimeter and remote areas without the cost of traditional AI cameras.
SNIPR TrailCam provides practical detection and alerting, with the option to add object recognition when needed.

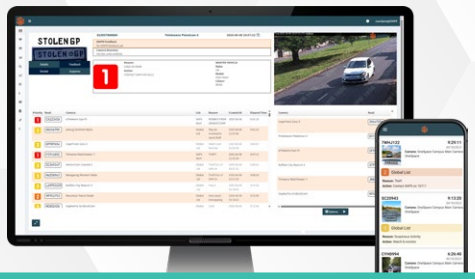

- Cost-effective cameras for perimeter and remote zones
- Line-crossing and motion-based alerts
- Optional object recognition with **SNIPR Spotter**
- Managed through **SNIPR.Online** and the **Patrol App**

Streetside ANPR

Detect vehicles of interest on the roads and parking approaches around the centre.
Streetside **SNIPR ANPR** continuously scans vehicles and alerts on stolen, criminal or suspicious plates, giving centre security early warning.

- Continuous scanning of vehicles on surrounding roads
- Alerts on vehicles of interest
- Early warnings empower proactive security, rather than reactive
- Can share camera infrastructure with access control ANPR

InSights MultiSight

Combine SNIPR, people and visitor data across every retail site you run. See known people and vehicles next to unknowns, apply a block across the portfolio, and manage risk from one set of live dashboards.

All Your Community Needs

in OneSpace

OneSpace equips centre management with modular tools that scale across every retail site they run. From 1iD identity management to SNIPR Spotter and SNIPR of Faces, customise coverage for each centre. Deliver alerts, tenant communication and professional reporting from one platform that grows with the portfolio.

Run people, visitors and SNIPR data together so known people and vehicles stay distinct from unknowns, and risk is managed across all sites. Experience the confidence of a unified platform that meets operational needs without extra systems or extra complexity.
