OneSpace

Farm Watch without the Chaos

Farm watches already look after these roads and farms. OneSpace gives that work a single place to live: people, properties, access, incidents and **SNIPR**. Reports stop disappearing into separate chats. The system is built for rural power and signal, with local backup so the watch keeps a record even when the connection is poor.

Modern problems need tools that still work on a farm. Residents use the **Connect App**. Coordinators use **Central**. Cameras watch the approaches. If power or signal fails, the site keeps running on local backup and sends the data on once the connection is back.

One watch. One record. Complete control.

TRACK INCIDENTS

Log crime, stock loss and municipal issues from the **Connect App** with location and photos, or use **OneChat** to raise a prefilled incident from **WhatsApp** groups. Track references, group linked issues and resolve with confidence.

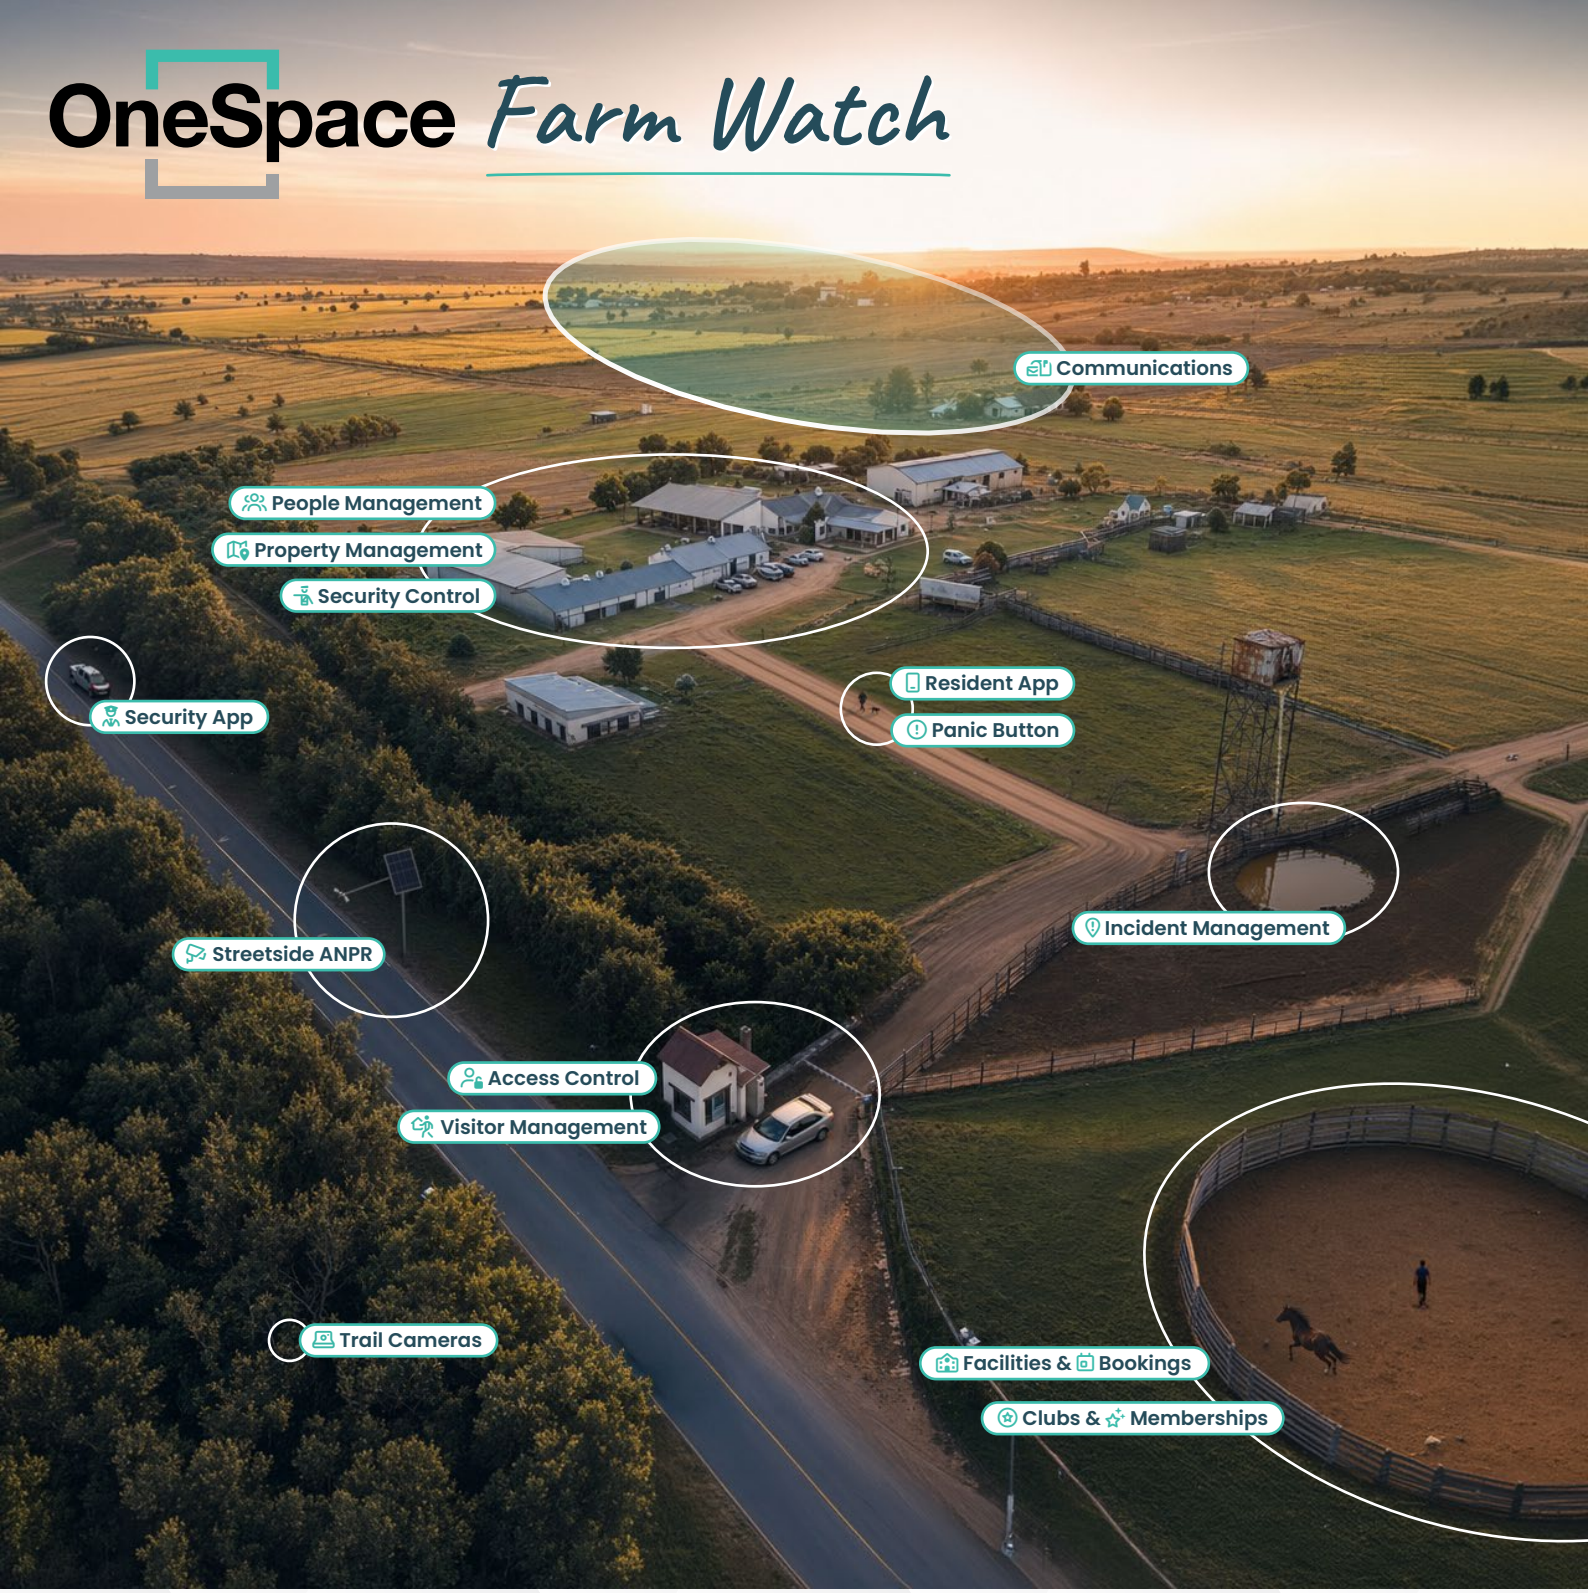

WATCH THE LAND

SNIPR watches the roads and farm edges and puts alerts in front of the control room and the patrol. **Trail cameras** cover quieter ground. **Streetside ANPR** flags vehicles of interest on the approaches.

BUILD COMMUNITY

Give every member a clear way to hear the same update, raise a problem, and take part. Coordinate **events** and **RSVPs**, **clubs** and **memberships**, book **facility appointments** and administer **access control** and **visitor management**.

Resident App

Panic Button

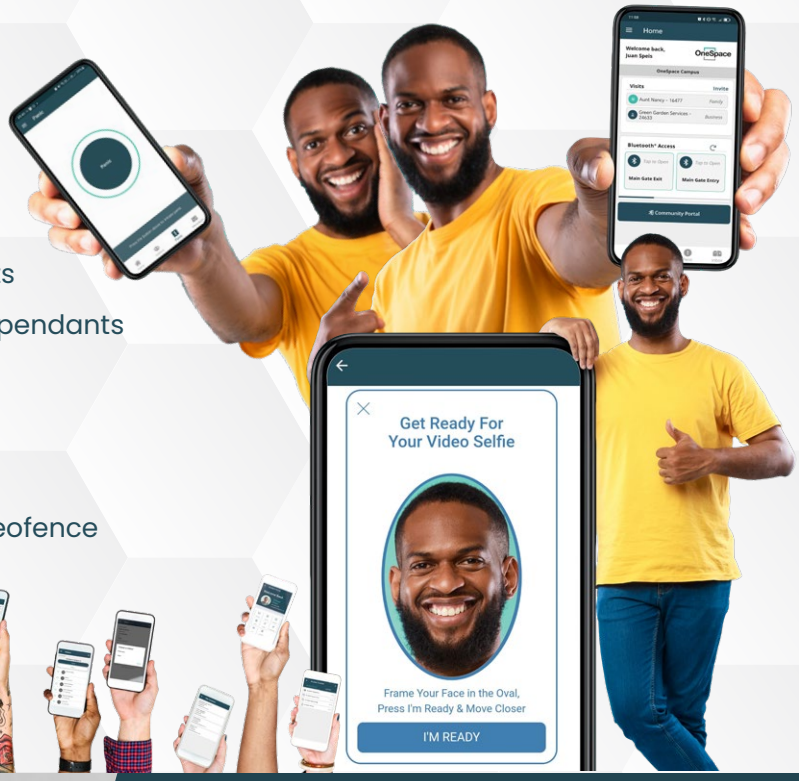

OneSpace Connect App

Give every resident and staff member a single, professional app from day one.

New people are onboarded quickly and can immediately use access methods, invite visitors, receive site notifications, manage their own details and access a nationally supported panic button. The experience feels modern and convenient, while coordinators retain full control through OneSpace Central.

One app for access, visitors, communication and self-management, ready the moment someone joins the watch.

- Bluetooth® access ready to use from day one
- Manage all access methods from a single app
- Fast onboarding for new residents
- Invite visitors directly from the app
- Receive real-time watch notifications and alerts
- Self-manage vehicles, personal details and dependants
- Report incidents with location data and photos
- View personal access and visitor activity
- All administered and controlled from Central
- Nationally supported panic button with area geofence routing and national backup when off site

1iD One secure digital identity for every person.

The account system that powers the entire OneSpace ecosystem, giving each individual a single, protected profile that travels with them. Fully POPIA compliant, it puts Data Subject information controls firmly in the hands of the user while still allowing managers the oversight they need.

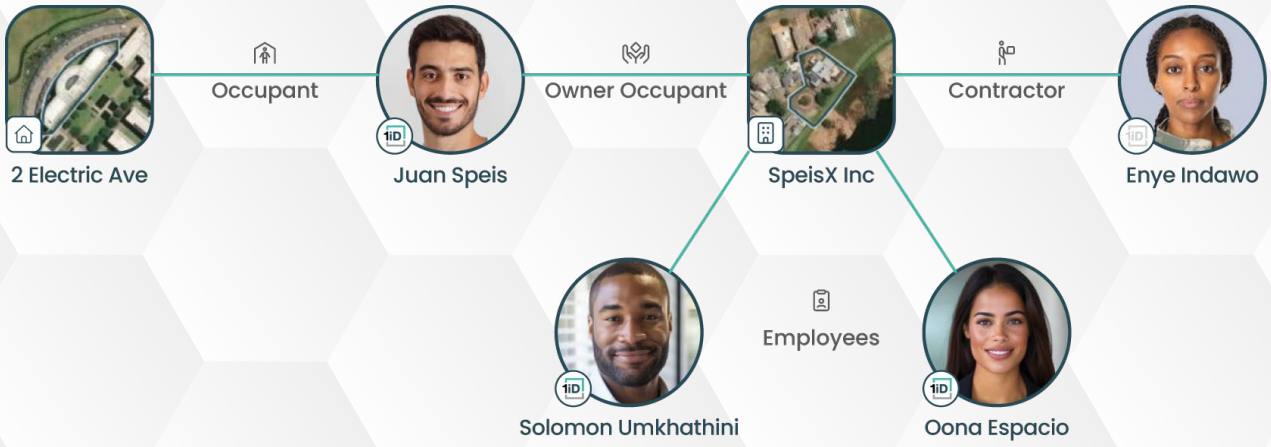

One account. One system. Complete control.

People Management

Property Management

Complete visibility of every property and every person

OneSpace Central gives coordinators a single, clear view of every farm, every resident and every staff member linked to the watch.

See every zone, every property and every person linked to the watch in one clear view. Understand exactly who belongs where, who has permission to enter, and how long those permissions remain valid.

Manage the lease or contract and the rest follows automatically within the OneSpace ecosystem. Residents and staff stay correctly linked to the right farms, while outdated access is controlled through simple validity dates.

The result is cleaner data, faster decisions and tighter operational control.

Complete Visibility

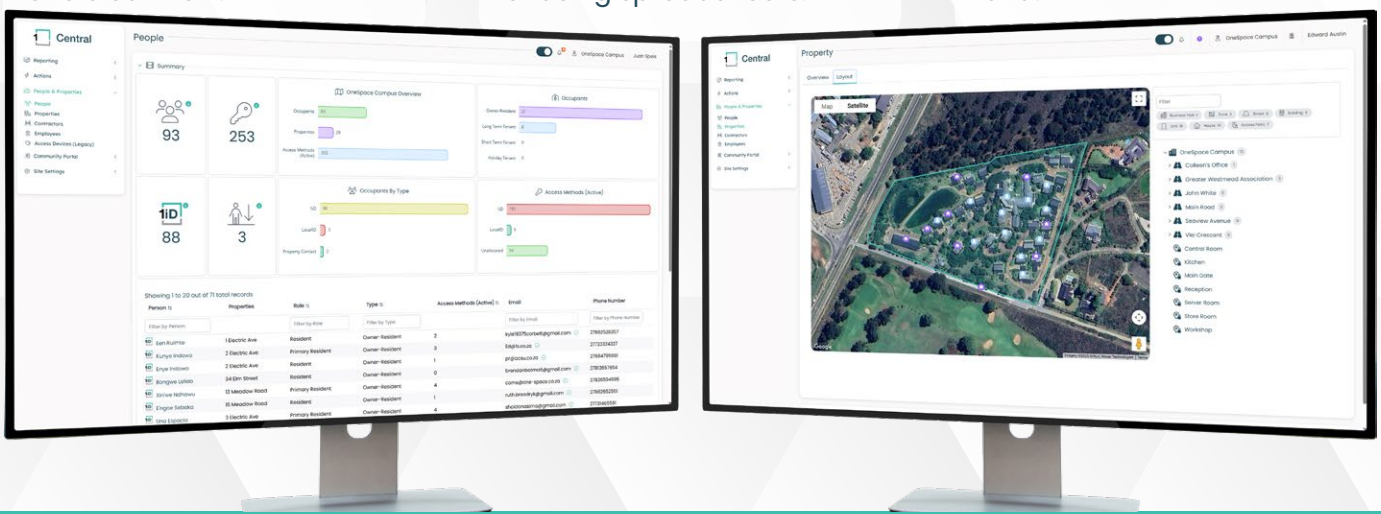

See every property, every resident and every person linked to the farm watch in one clear view.

Accurate Records

Keep ownership, occupancy and access rights current without chasing spreadsheets.

Controlled Validity

Validity dates automatically manage when permissions start and end.

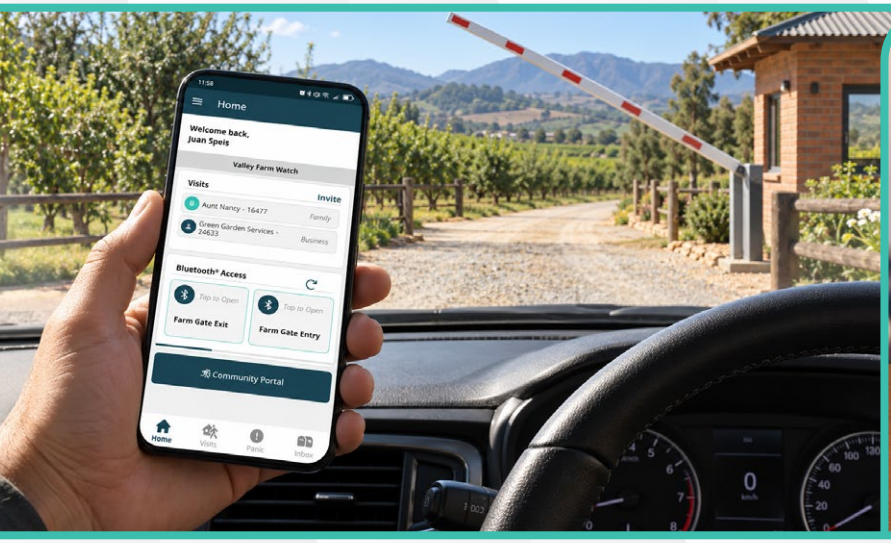

Access Control

OneAccess

Give members convenient, controlled access while coordinators retain full oversight.

Flexible access methods work at farm gates and buildings, and managers set exact rights, times and locations from **Central**. The result is smooth movement for authorised people and clear records of every entry and exit.

- Bluetooth® Access
- Face Biometric Access
- Card & Tag Access
- Codehopping Remote Access
- ANPR Access
- Managers control times, days and locations for each method
- Seamless entry for residents and staff
- Full access reports and history in Central
- Works as part of the single system solution

Visitor Management

Know exactly who is on site and why they are there, whether they arrive invited or as walk-ins. Visitors can be invited in advance with PIN or QR access, or processed on arrival at the farm gate or office using **GateBook**. The system is highly flexible, allowing visitor passes to be limited by number of uses, by validity dates, or by both.

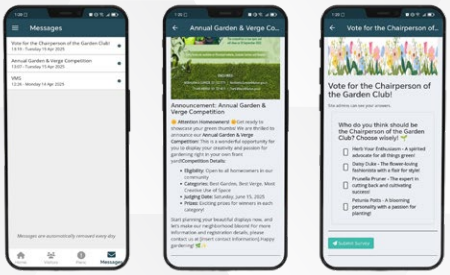

- Invite visitors with PIN or QR codes for keypad or **GateBook** entry
- Process walk-in visitors at the gate with **GateBook**
- Process walk-in visitors at the office with **GateBook for Reception**
- Create visitor passes limited by uses, dates, or both
- Capture visitor and vehicle details with clear host links
- Track entries, exits and current visitors in the watch area

Communications

Keep everyone informed without relying on scattered WhatsApp groups or emails.
Managers send targeted messages from **Central** to individuals, properties or groups. Recipients receive them directly in **Connect App**, creating clear, traceable communication across the watch.

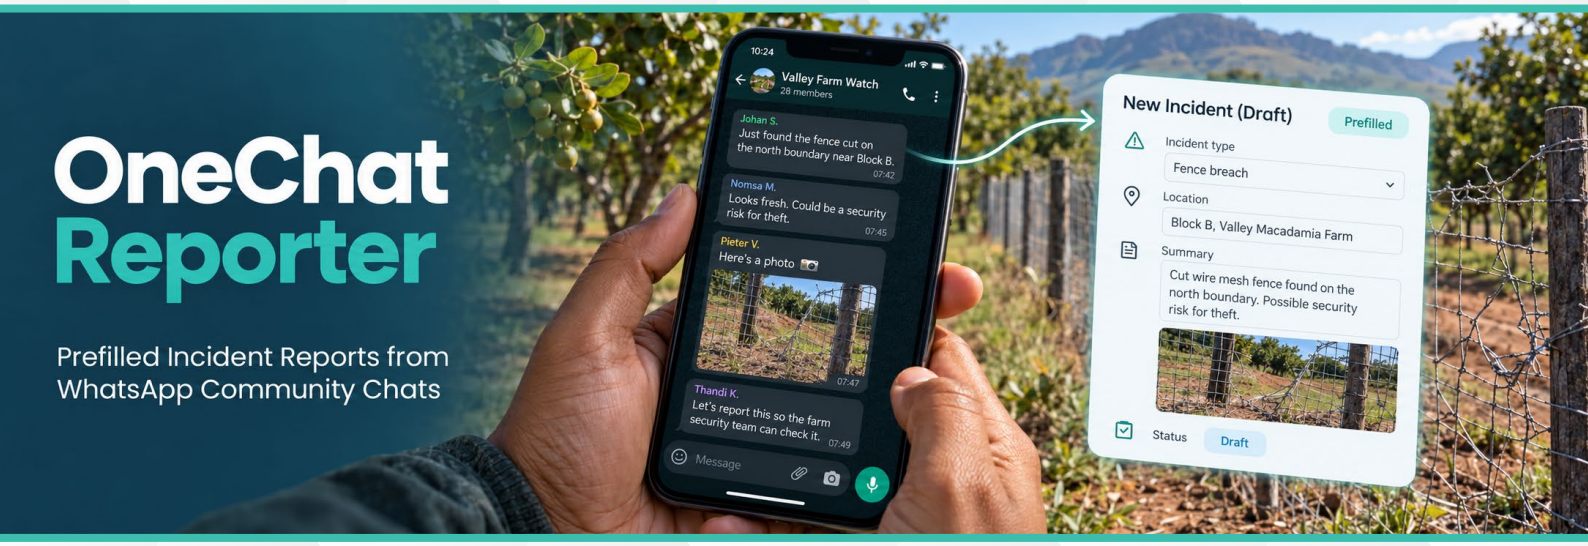

- Send announcements and updates from **Central**
- Target specific people, properties, groups or custom sendlists
- Messages delivered optionally to **Connect App** and email

Incident Management

Capture and manage incidents properly from the moment they happen.
Members report incidents from the Connect App with location data and photos. Managers review, update and close them in Central, creating a clear record for the estate.

- Report incidents with location and photos
- Manage and track incidents in **Central**
- Geo-tagged records for better oversight

Facilities & Bookings

Members book facilities directly from the app.
Managers set availability, rules and approvals.

- Real-time availability
- Simple booking and approval flow
- Clear calendar displays of slots

Clubs & Memberships

Create and manage clubs or interest groups within the watch.

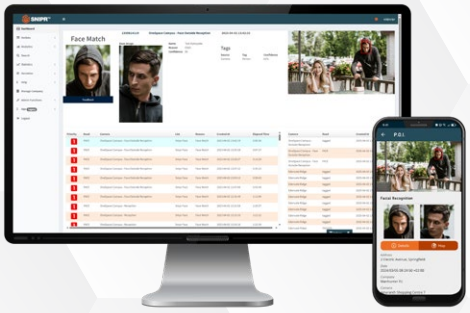

- Easy club creation and membership
- Member lists and updates
- Integrated with Communications

Security Control

Security App

Give the control room a live view of the farms and the roads between them, and put the same SNIPR alerts on the phones of people already in the field. See it on SNIPR.Online in the control room, or on the OneSpace Patrol app in the field.

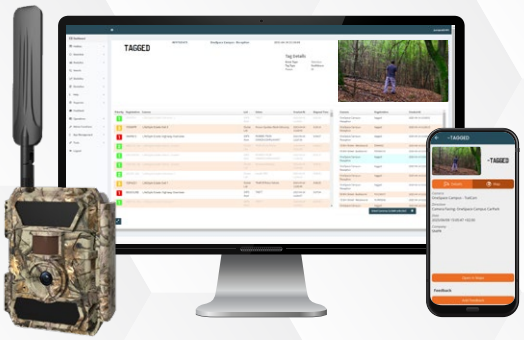

- Live alert dashboard for ANPR, object recognition and faces
- Alert history and vehicle of interest information
- Visual confirmation and vehicle details
- Device health monitoring for cameras and network

Trail Cameras

Cover quieter fence lines and remote ground without the cost of traditional AI cameras. **SNIPR TrailCam** gives practical detection and alerting, with object recognition when you need it.

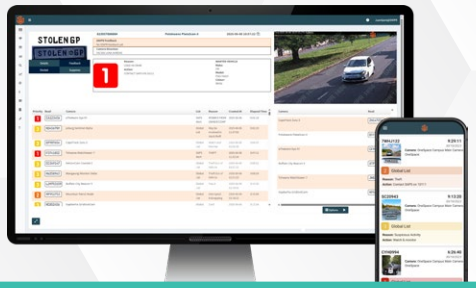

- Cost-effective cameras for perimeter and remote zones
- Line-crossing and motion-based alerts
- Optional object recognition with **SNIPR Spotter**
- Managed through **SNIPR.Online** and the **Patrol App**

Streetside ANPR

Detect vehicles of interest on the roads through the watch area. Streetside **SNIPR ANPR** scans vehicles and alerts on stolen, criminal or suspicious plates, so the watch sees them on the approach.

- Continuous scanning of vehicles on surrounding roads
- Alerts on vehicles of interest
- Early warning before vehicles reach your assets
- Can share camera infrastructure with access control ANPR

InSights MultiSight

Combine data from your various farms into live, actionable dashboards. See detections, patterns and activity in one view. Brief your teams and report to clients with a new level of operational oversight.

All Your Community Needs

in OneSpace

OneSpace gives rural farm watches modular tools that sit in one system, delivering peace of mind and a clearer picture of the land. From 1iD for secure identity to trail cams, panic and SNIPR on the approaches, set the watch up around the farms, the incidents and the people who live and work there.

Experience the confidence of a unified platform that adapts to rural conditions. Respond faster, keep one record across the farms, and keep the watch together without extra complexity.
