OneSpace

Private Security. Simplified.

OneSpace gives a **private security company one system** for the sites it protects. Control access and visitors, keep people linked to the right properties, and put alerts in front of the **control room** and the **patrol**. Central holds the **operational picture** so incidents are noticed earlier and reported cleanly to the client.

The result is **coordinated protection** across every contracted site. Incidents are recorded properly, **SNIPR alerts** reach the people who can act, and **everyday communication** stays targeted instead of scattered.

Deliver **faster response** and **clearer client reporting** from **one platform**.

PROTECT YOUR COMMUNITY

SNIPR watches the roads throughout your area and puts alerts in front of the **control room** and **patrollers**. **Trail cameras** cover quieter areas. **Streetside ANPR** flags vehicles of interest and **roadblock scanners** check vehicles against the same databasis.

SINGLE SYSTEM

People, properties, access, visitors and incidents sit in Central. SNIPR watches the roads and feeds the control room and the patrol. InSights then **combines** that **site data** into live dashboards, so operators brief from one **operational view** and report to clients with **real oversight**.

REPORT CLEARLY

Log **incidents** with **location** and **photos** from the moment they happen. Review, assign and close them in Central, then hand the client a **clean record**. When a **WhatsApp** chat is the first report, OneChat turns that thread into a **prefilled incident draft**.

Member App Panic Button

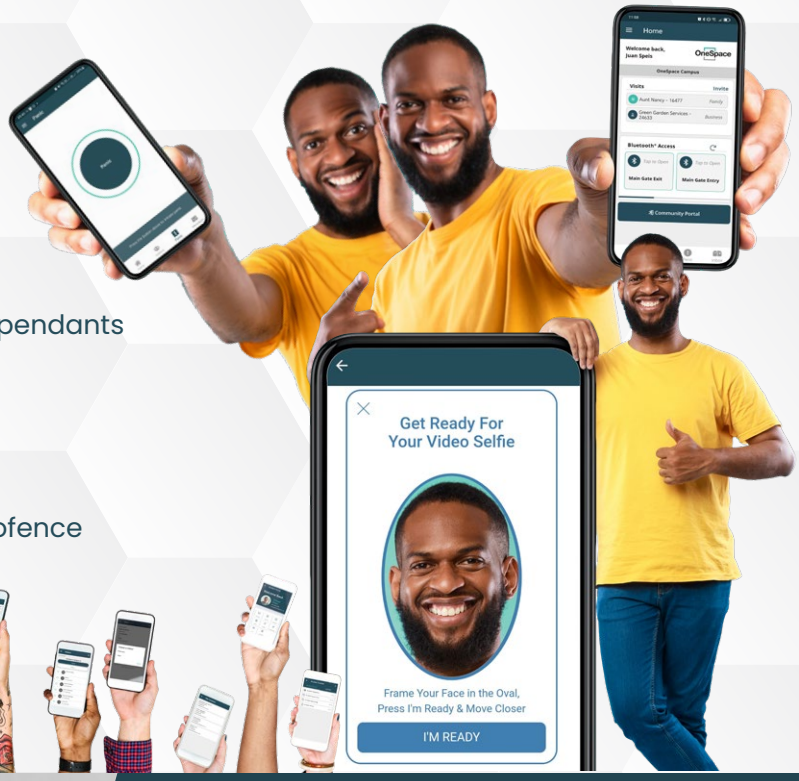

OneSpace Connect App

Give every authorised person and household a single, professional app from day one.

New people are onboarded quickly and can immediately use access methods, invite visitors, receive site notifications, manage their own details and access a nationally supported panic button. The experience feels modern and convenient, while the control room retains full control through Central.

One app for access, visitors, communication and self-management, ready the moment they are linked to a protected site.

- Bluetooth® access ready to use from day one
- Manage all access methods from a single app
- Fast onboarding for new clients
- Invite visitors directly from the app
- Receive real-time notifications and alerts
- Self-manage vehicles, personal details and dependants
- Report incidents with location data and photos
- View personal access and visitor activity
- All administered and controlled from Central
- Nationally supported panic button with site geofence routing and national backup when off site

1iD One secure digital identity for every person.

The account system that powers the entire OneSpace ecosystem, giving each individual a single, protected profile that travels with them. Fully POPIA compliant, it puts Data Subject information controls firmly in the hands of the user while still allowing managers the oversight they need.

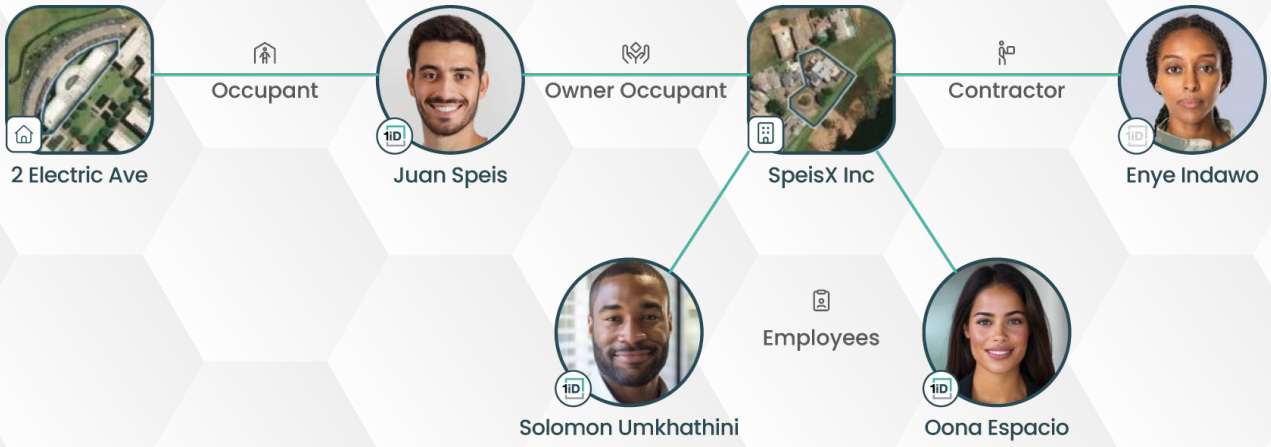

One account. One system. Complete control.

People Management

Property Management

Complete visibility of every property and every person

OneSpace Central gives operators a single, clear view of every property, every person and every permission on the sites they protect.

See every unit, property, every person linked to the site in one clear view. Understand exactly who belongs where, who has permission to enter, and how long those permissions remain valid.

Manage the site record and the rest follows automatically within the OneSpace ecosystem. Residents and household members stay correctly linked to the right properties, while outdated access is controlled through simple validity dates.

The result is cleaner data, faster decisions and tighter operational control.

Complete Visibility

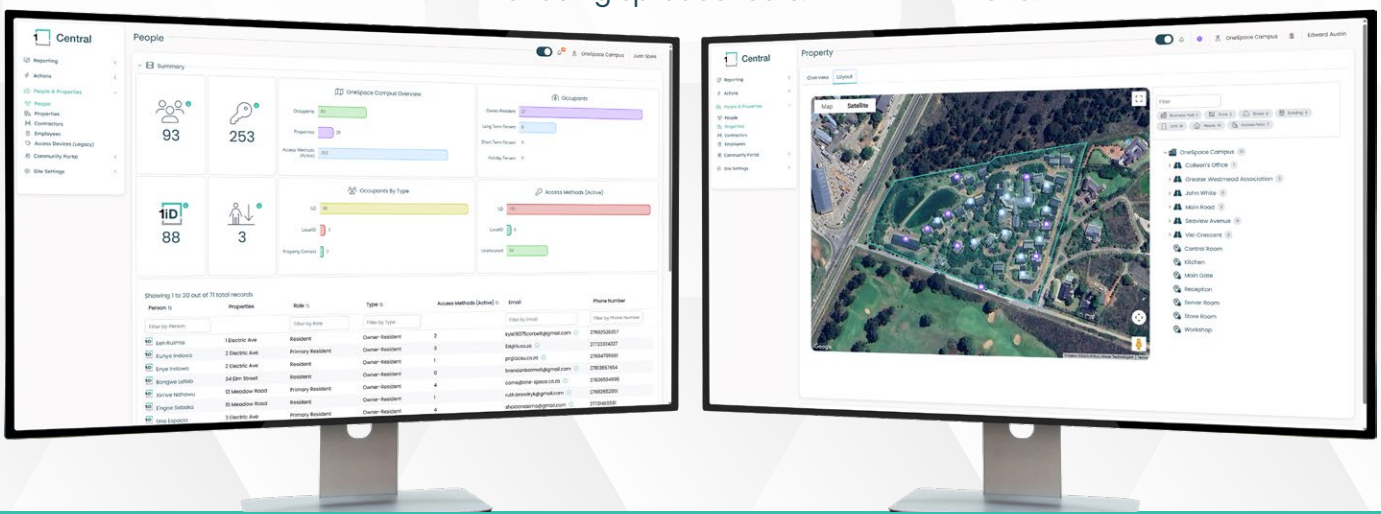

See every property and every person linked to the site in one clear view.

Accurate Records

Keep ownership, occupancy and access rights current without chasing spreadsheets.

Controlled Validity

Validity dates automatically manage when permissions start and end.

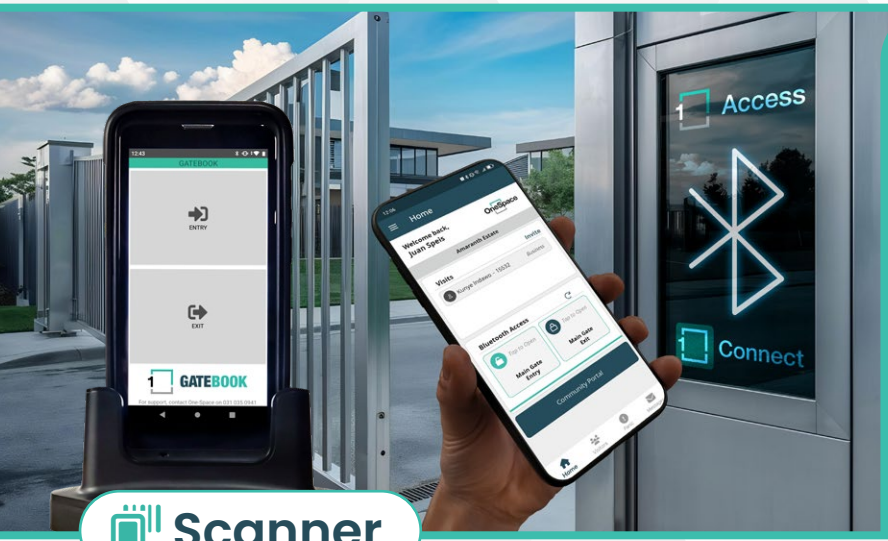

Access Control

OneAccess

Give authorised people convenient, controlled access while the control room retains full oversight.

Flexible access methods work at every gate and door, and managers set exact rights, times and locations from **Central**. The result is smooth movement for authorised people and clear records of every entry and exit.

- Bluetooth® Access
- Face Biometric Access
- Card & Tag Access
- Codehopping Remote Access
- ANPR Access
- Managers control times, days and locations for each method
- Seamless entry for authorised people
- Full access reports and history in Central
- Works as part of the single system solution

Scanner

Visitor Management

Reception Kiosk

Know exactly who is on site and why they are there, whether they arrive invited or as walk-ins. Visitors can be invited in advance with PIN or QR access, or processed on arrival at the gate or reception using **GateBook**. The system is highly flexible, allowing visitor passes to be limited by number of uses, by validity dates, or by both.

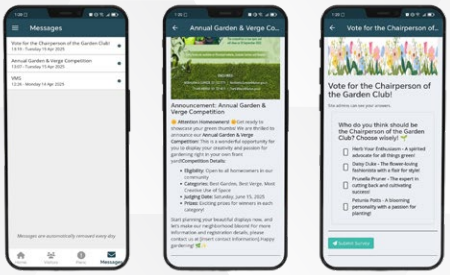

- Invite visitors with PIN or QR codes for keypad or **GateBook** entry
- Process walk-in visitors at the gate with **GateBook**
- Process walk-in visitors in reception with **GateBook for Reception**
- Create visitor passes limited by uses, dates, or both
- Capture visitor and vehicle details with clear host links
- Track entries, exits and current visitors

Communications

Keep everyone informed without relying on scattered WhatsApp groups or emails.
Managers send targeted messages from **Central** to individuals, properties or groups. Recipients receive them directly in **Connect App**, creating clear, traceable communication across your area.

- Send announcements and updates from **Central**
- Target specific people, properties, groups or custom sendlists
- Messages delivered optionally to **Connect App** and email

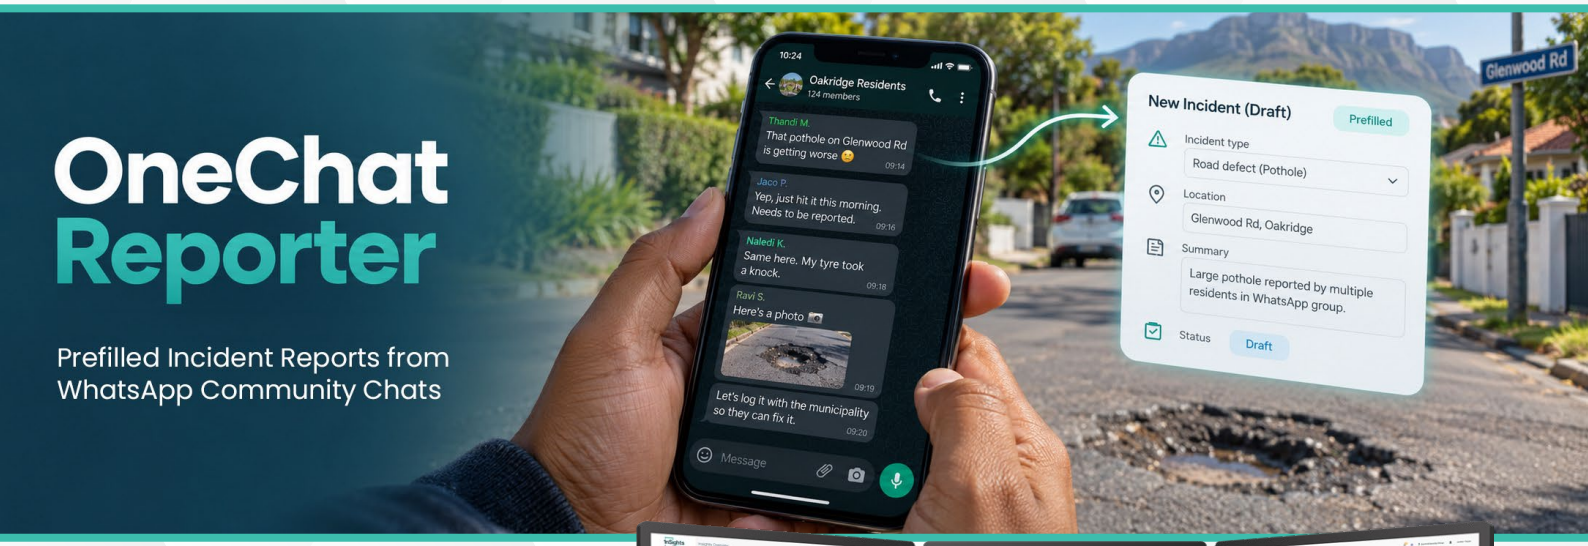

Incident Management

Capture and manage incidents properly from the moment they happen.
Residents report incidents from the **Connect App** with location data and photos. Managers review, update and close them in **Central**, creating clear record for your company and clients.

- Report incidents with location and photos
- Manage and track incidents in **Central**
- Geo-tagged records for better oversight

Security Control

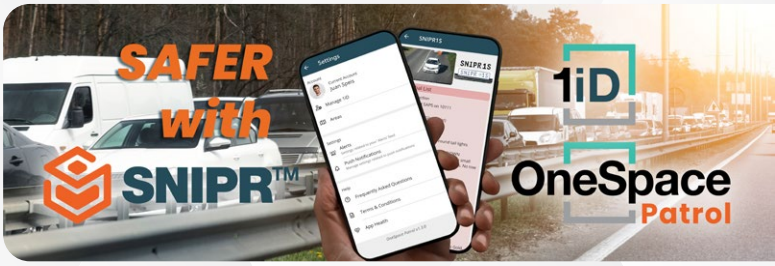

Give your control room a clear, live view of what is happening across each protected site and surrounding roads. **SNIPR.Online** delivers real-time alerts, detection details and heatmaps so operators can respond quickly and with full context.

- Live alert dashboard for ANPR, object recognition and facial recognition
- Detailed alert history and vehicle of interest information
- Heatmaps showing movement patterns
- Device health monitoring for cameras and network

Security App

Put the same powerful alerts into the hands of your response teams.
The **OneSpace Patrol app** delivers **SNIPR** alerts directly to patrollers and security personnel in the field, so they can act immediately.

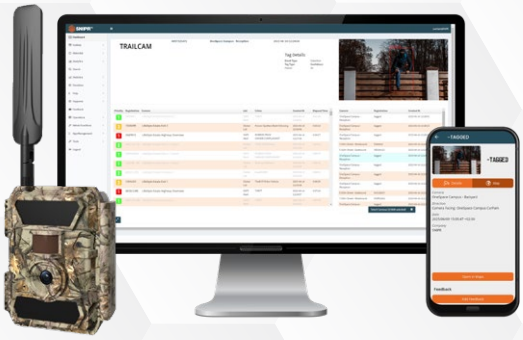

- Real-time alerts on mobile devices
- Visual confirmation and vehicle details
- Designed for in-field response teams
- Works alongside **SNIPR.Online**

Trail Cameras

Extend reliable surveillance to perimeter and remote areas without the cost of traditional AI cameras. **SNIPR TrailCam** provides practical detection and alerting, with the option to add object recognition when needed.

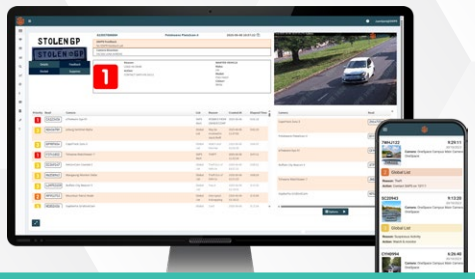

- Cost-effective cameras for perimeter and remote zones
- Line-crossing and motion-based alerts
- Optional object recognition with **SNIPR Spotter**
- Managed through **SNIPR.Online** and the **Patrol App**

Streetside ANPR

Detect vehicles of interest on the roads around every site you protect.
Streetside **SNIPR ANPR** continuously scans vehicles and alerts on stolen, criminal or suspicious plates, giving your security team early warning.

- Continuous scanning of vehicles on surrounding roads
- Alerts on vehicles of interest
- Early warnings empower proactive security, rather than reactive
- Can share camera infrastructure with access control ANPR

InSights MultiSight

Combine data from your various sites into live, actionable dashboards. See detections, patterns and site activity in one view. Brief your teams and report to clients with a new level of operational oversight.

All Your Community Needs

in OneSpace

OneSpace equips private security companies with modular tools that scale across their entire area of operation. From 1iD identity management to SNIPR Spotter and SNIPR of Faces, customise coverage for every client. Deliver rapid alerts, centralised control, and professional reporting from one platform that grows with your business.

Experience the confidence of a unified platform that meets your operational needs, fostering rapid responses and stronger professional networks without complexity.
