1 Access

Secure Communities, Simplified

Introducing the Single System Solution

OneAccess delivers **cloud-based access control** and **visitor management** in one **powerful**, **unified** system. Residents and visitors enjoy multiple access methods to suit their needs, from **smartphones** and **biometrics** to **tags** and **remotes**, all **working together seamlessly** without added complexity. Installers benefit from flexible hardware compatibility, easy setup, and **full reporting** on every interaction. Designed for **estates**, **complexes**, and **businesses**, **OneAccess** streamlines **secure entry** and provides managers with **complete oversight**. Experience the convenience of the Single System Solution.

FLEXIBLE ENTRY OPTIONS

Choose **multiple access methods** in **one system**, including **Bluetooth®** in **Connect app**, **biometrics**, **RFID/UHF**, **remotes**, and **license plate recognition**, in **OneSpace**.

RESIDENT & MANAGER TOOLS

Residents can handle **access**, **visitor invites**, and **their biometrics**. Managers create **permissions**, monitor **devices**, send **communications** and get **reports**, in **OneSpace**.

INTELLIGENT THREAT DETECTION

SNIPR provides powerful **ANPR**, **AI object recognition**, and **biometric alerts**, ensuring **real-time intelligence** with powerful tools for **efficient security**, in **OneSpace**.

How it Works

OneAccess connects compatible hardware (readers, gateways, controllers supporting various modern standards, including Bluetooth®, BLE, and more) to our **cloud platform** for secure, auditable access control and visitor management. Multiple access methods operate together seamlessly: residents use Bluetooth® from the Connect app, facial or fingerprint biometrics, RFID/UHF cards and tags, remotes, or license plate recognition for automatic vehicle entry. Every interaction logs centrally. Managers use Central to set permissions, monitor devices, and generate detailed reports. SNIPR adds powerful surveillance with ANPR, AI object recognition, and biometric alerts for real-time perimeter intelligence.

- **Multiple access methods** in one **unified system:** Bluetooth®, biometrics (face/fingerprint), RFID/UHF cards and tags, code-hopping remotes, license plate recognition. All with central reporting and control.
- Advanced security through detailed logs, instant notifications, and real-time alerts across every method.
- Scalable, **POPIA-compliant cloud storage** for reliable, long-term performance.

Why Single System?

When systems come from different suppliers, issues often create confusion, with everyone pointing to someone else and leaving you waiting for answers. Separate setups also scatter reports, making it hard to see the full picture or manage things smoothly.

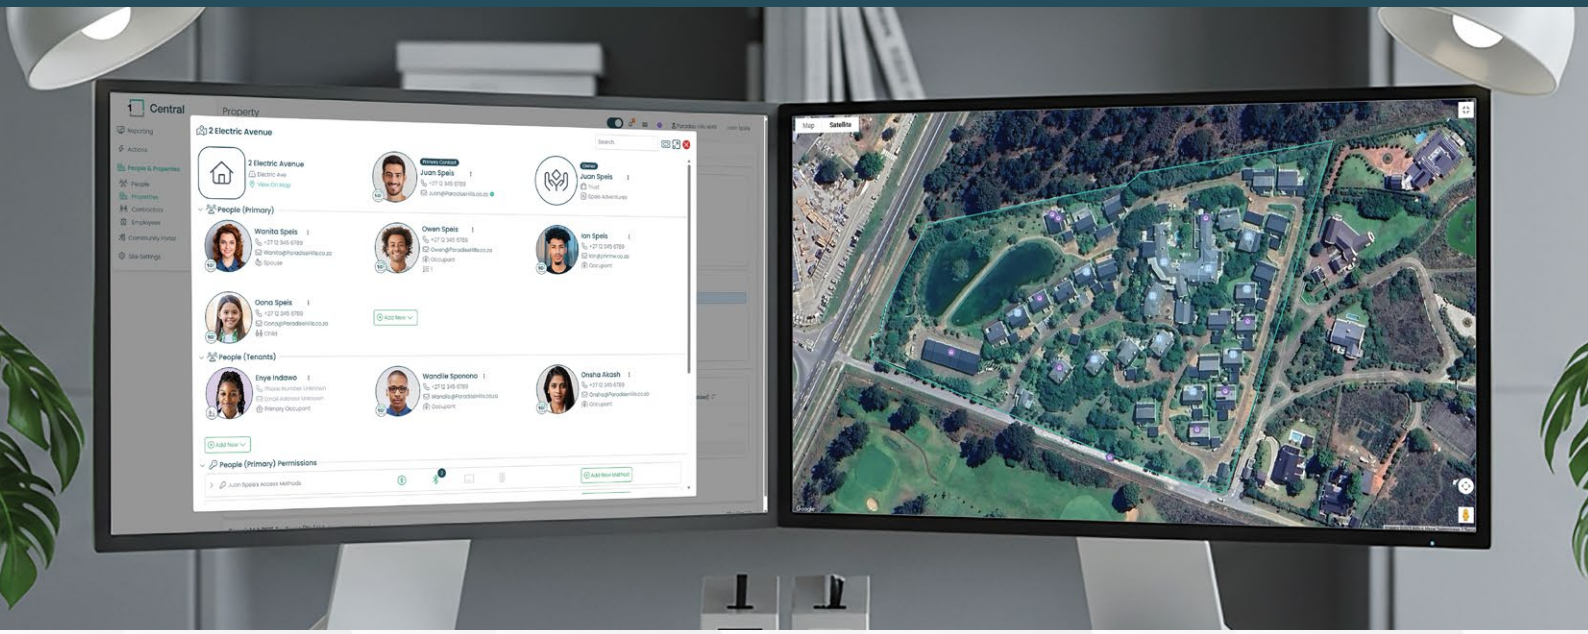

The OneSpace single system fixes that. Everything connects modular and seamless, so it works together reliably from the start. People appear as people, not just codes, keeping interactions natural and easy.

1 Connect

OneSpace Connect App offers secure **Bluetooth® access** for residents. **Request** or **view active** methods with **easy control**.

Scan face biometrics for rapid entry, ensuring peace of mind. Enhance estate safety with **seamless authentication**.

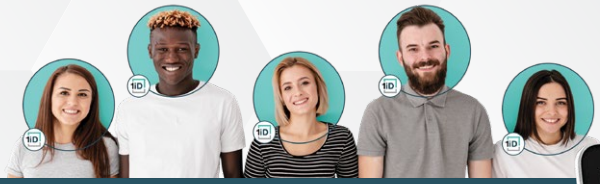

Manage with Ease

1 Central

OneSpace Central is your simple, powerful online portal for full control. From one login, managers oversee access rights, monitor devices, view detailed logs, and keep communities running smoothly. Property pages show residents, visitors, contractors, and staff as real people with clear profiles, access history, and status, so you can allocate or adjust rights quickly. With GIS-enhanced dashboards and insights, you gain clear visibility into locations, trends, and patterns for better decision-making and safer communities.

With **Central** at the heart of **OneSpace**, managers enjoy effortless control, clearer visibility, and stronger community connections, all in one reliable platform. Whether you're overseeing a single estate or multiple sites, it simplifies daily tasks and gives you the confidence that everything is running smoothly and securely.

1 Central

Automated Email Reporting

Set up customised reports in **Central** to be **automatically emailed** as often as needed; daily, weekly, or on demand. Receive summaries of **access events, visitor logs**, and more directly in your inbox for **effortless monitoring** and compliance.
