OneSpace

1nSights

1nSights

See what your systems are really showing you.

1nSights is a powerful module for **OneSpace Central** that transforms the data from your existing systems into clear, actionable intelligence. With real-time visibility, visitor pattern analysis, and predictive threat forecasting, you gain deeper oversight of your sites so you can respond faster, strengthen security, and make more informed decisions.

DATA IN CONCERT

Bring together access control, visitor management, ANPR, facial recognition and community data from across the OneSpace ecosystem into one clear operational picture.

IN-DEPTH ANALYSIS

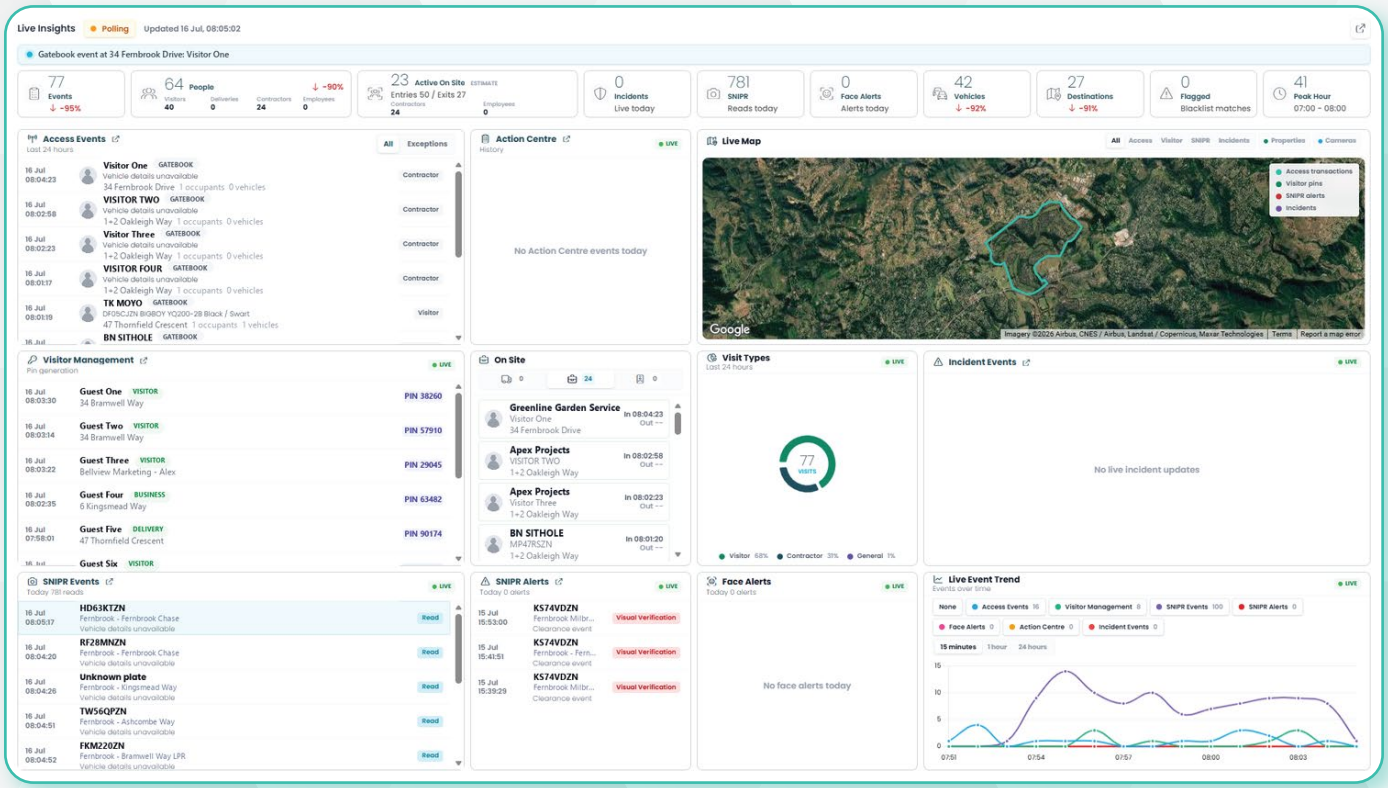

See patterns, relationships and risks that were previously hidden. Gain the clarity to respond faster, investigate more effectively and make better decisions every day.

MULTIPLIED INSIGHT

Extend that same intelligence across every site in your portfolio. Compare performance, monitor device health and manage watchlists from a single command view.

Live Insights

1nSights

Live Insights delivers real-time visibility across your estate. It brings together **access control**, **visitor management**, and **SNIPR** data into one powerful screen so you can see exactly what is happening right now.

- Monitor **live activity** with maps, feeds, and summary cards that update continuously
- Spot incidents and exceptions **instantly** so you can respond faster
- Gain **immediate situational awareness** without switching between systems

MultiSight

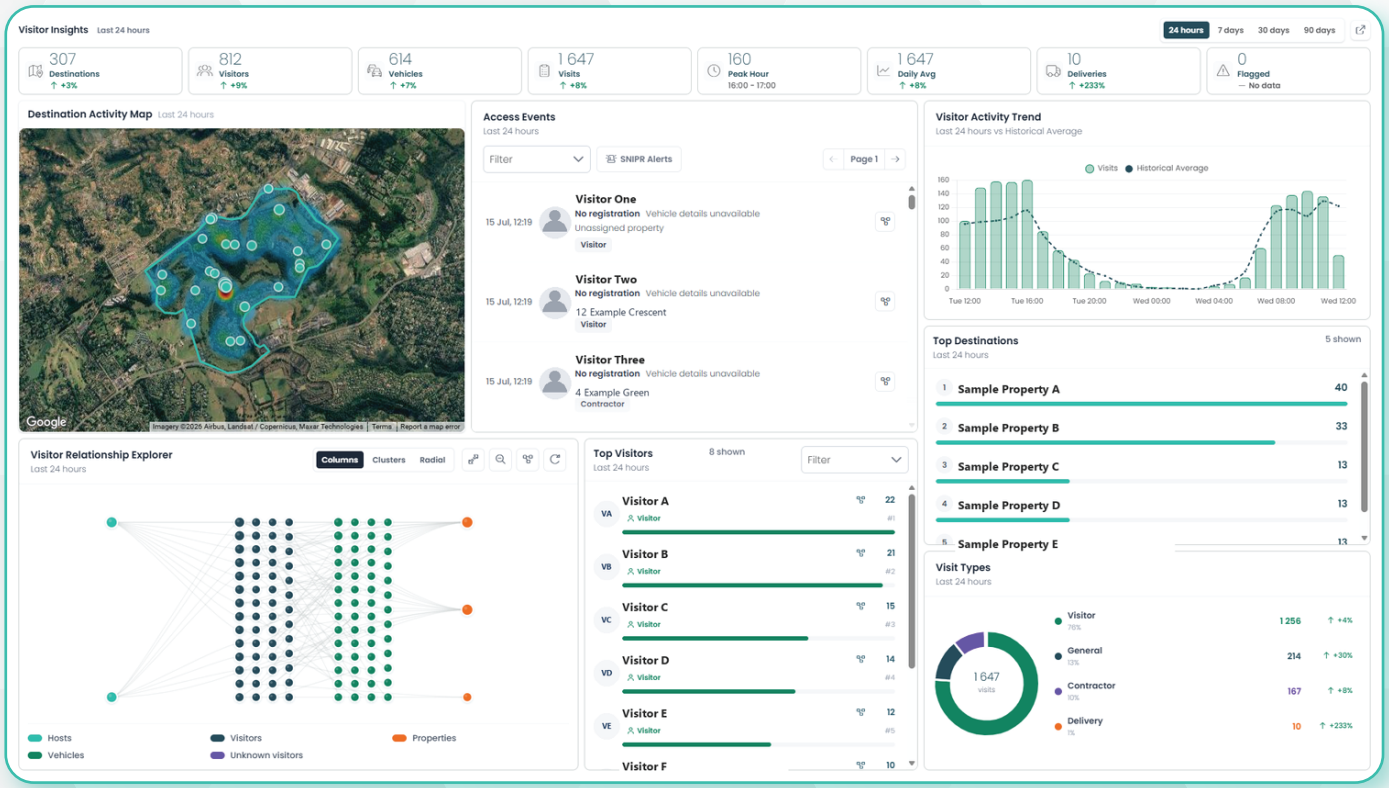

Take the same real-time operational view across every site in your portfolio. Monitor live activity, exceptions and device status from one command screen instead of switching between individual sites.

- Multi-site live maps, feeds and summary cards
- Instant visibility of activity and exceptions across your entire portfolio

Visitor Insights

1nSights

Visitor Insights helps you understand visitor activity and relationships across your estate. It combines live and historical data to give you clear visibility into who is visiting, where they are going, and how they connect to your properties.

The **Destination Activity Map** shows visitor hotspots and patterns in real time

Visitor Relationship Explorer reveals visitor, host, vehicle, and property connections

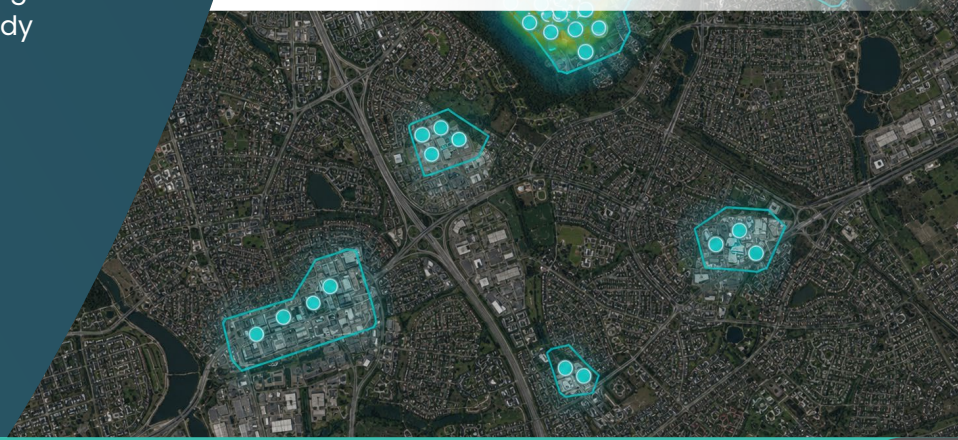

Trend analysis and visitor reports help you **spot anomalies** and plan more effectively

MultiSight

Extend visitor intelligence across every site in your portfolio. Compare patterns, relationships and anomalies between sites from a single view, without losing the detail you already rely on.

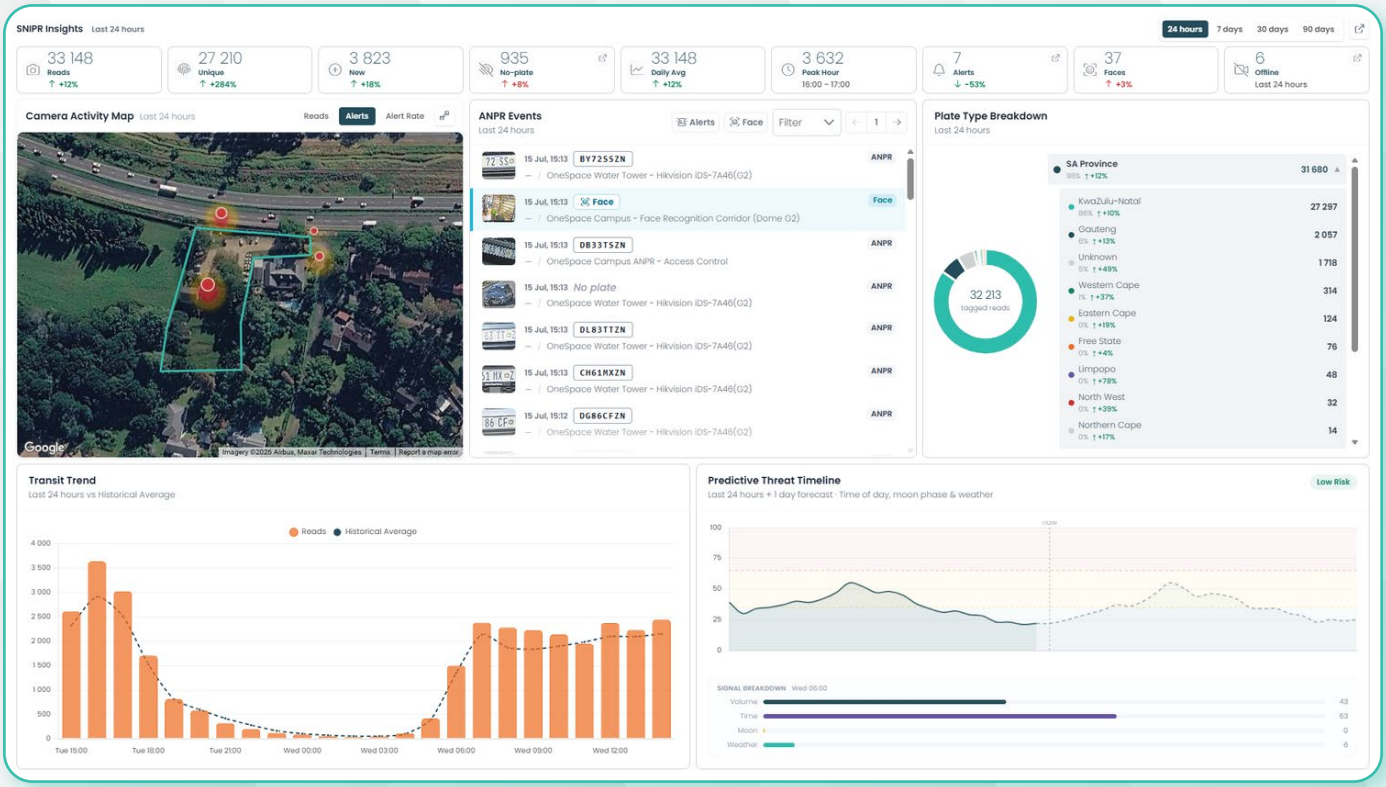

- Multi-site visitor activity maps and relationship analysis
- Clearer portfolio-wide understanding of who is visiting where, and why

1nSights MultiSight

SNIPR Insights

1nSights

SNIPR Insights brings advanced vehicle and face recognition intelligence to **OneSpace Central**. It combines real-time monitoring with predictive analysis to give you deeper visibility and help you stay ahead of potential risks.

Camera Activity Map shows live vehicle and face detection patterns

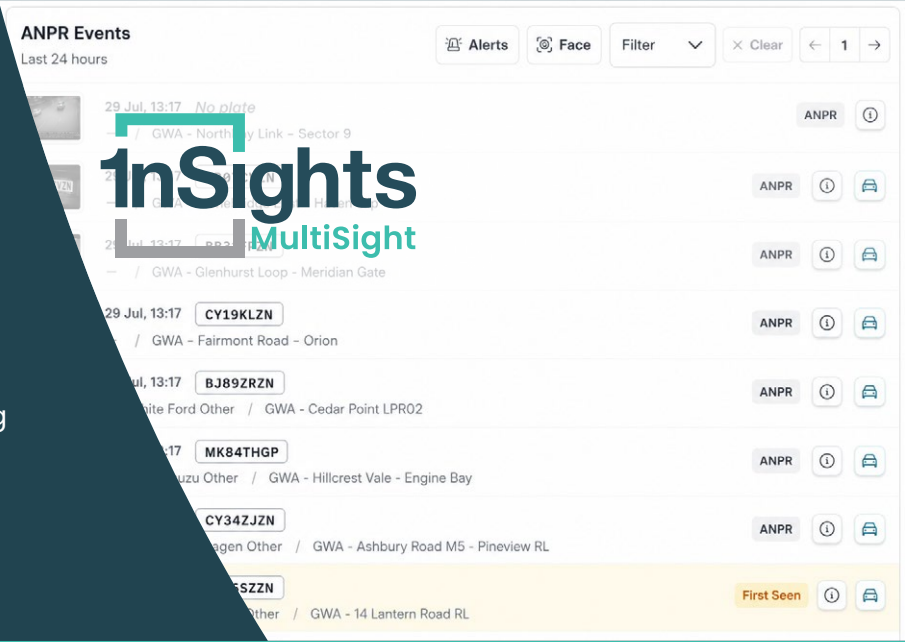

Transit Trend charts compare current activity to historical averages

Predictive Threat Timeline forecasts risks using time, moon phase and weather

MultiSight

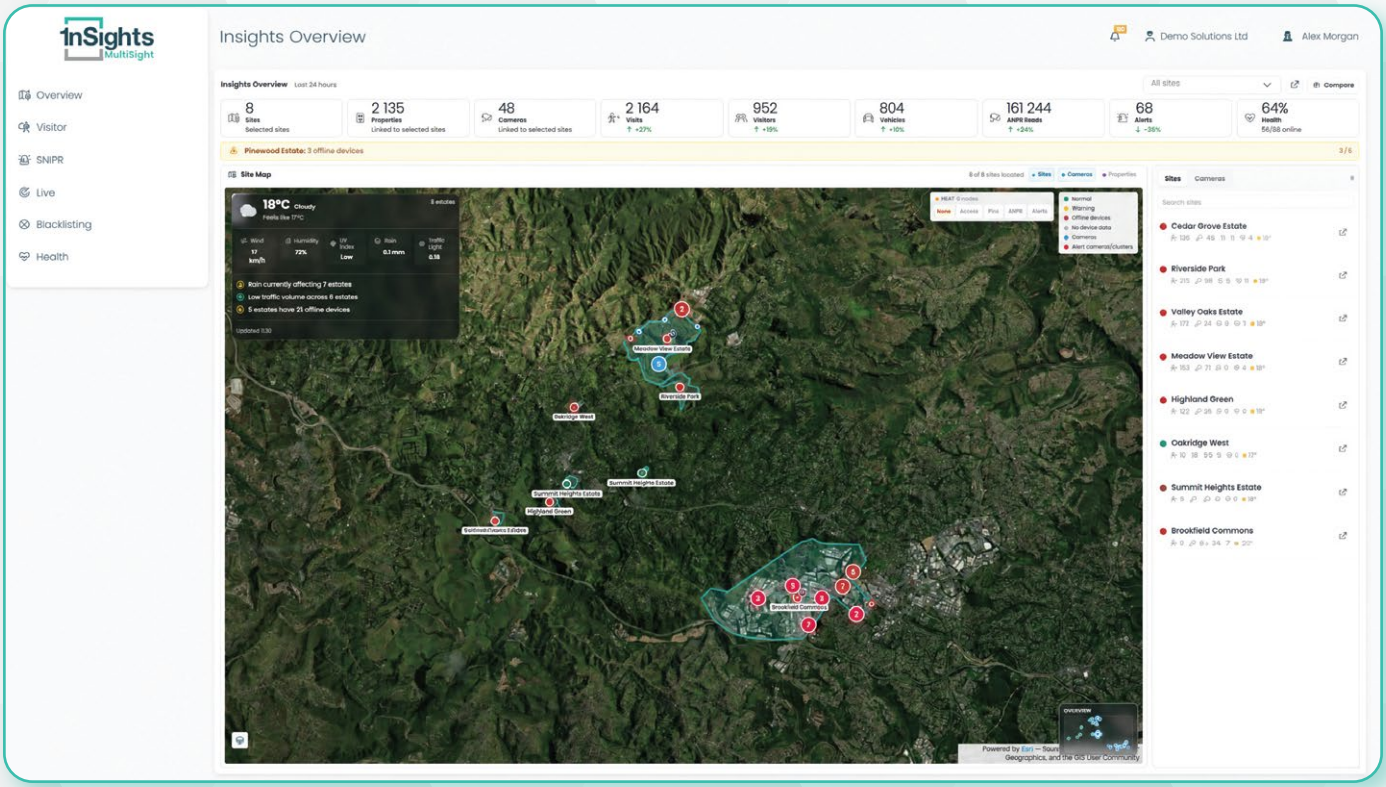

See SNIPR ANPR activity across your entire portfolio in one place. Identify vehicles that have never been seen on your network before, track cross-site movements, and surface risks that would otherwise remain hidden in individual site data.

- Multi-site ANPR and face event monitoring
- Clear visibility of first-seen vehicles and cross-site patterns that increase risk

1nSights MultiSight

MultiSight extends the power of **1nSights** across every site in your portfolio. Instead of managing each estate in isolation, you gain a single operational view that combines live activity, visitor intelligence, vehicle data and device health from all your sites.

Insights Overview

The **Insights Overview** page is the multi-site command centre. It gives you an immediate picture of activity, alerts and device status across the sites available to your management company, so you can focus attention where it is needed most.

Portfolio Visibility

Rolling 24-hour summary of visits, visitors, vehicles, ANPR reads, alerts and device health across all selected sites, so you can immediately see where attention is required.

Spatial Context

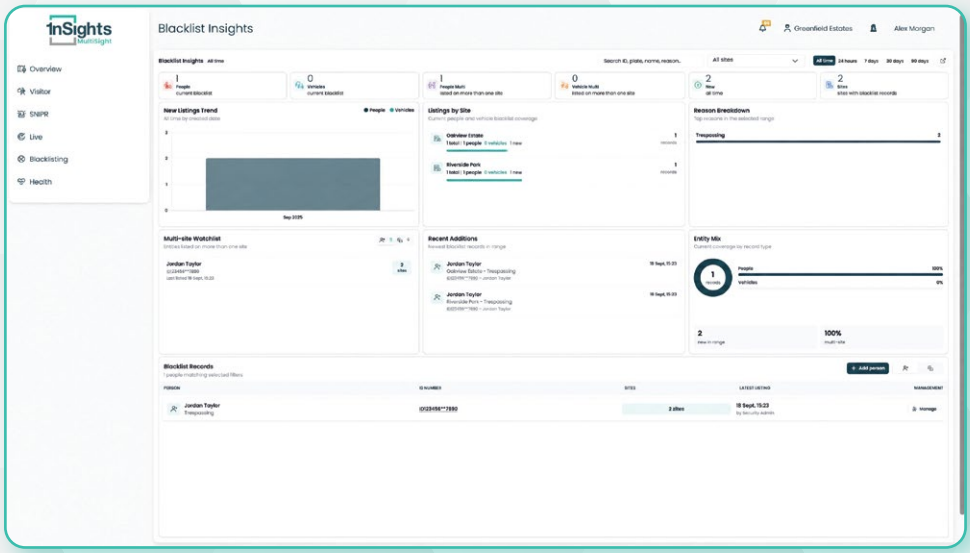

Interactive Site Map that combines site locations with live activity, cameras, properties, weather and device status, giving you clear spatial context at a glance.

One-Click Access

Easy site comparison and one-click access to any individual site's Live, Visitor, SNIPR, Health or Blacklisting view for faster investigation and response.

Blacklist Insights

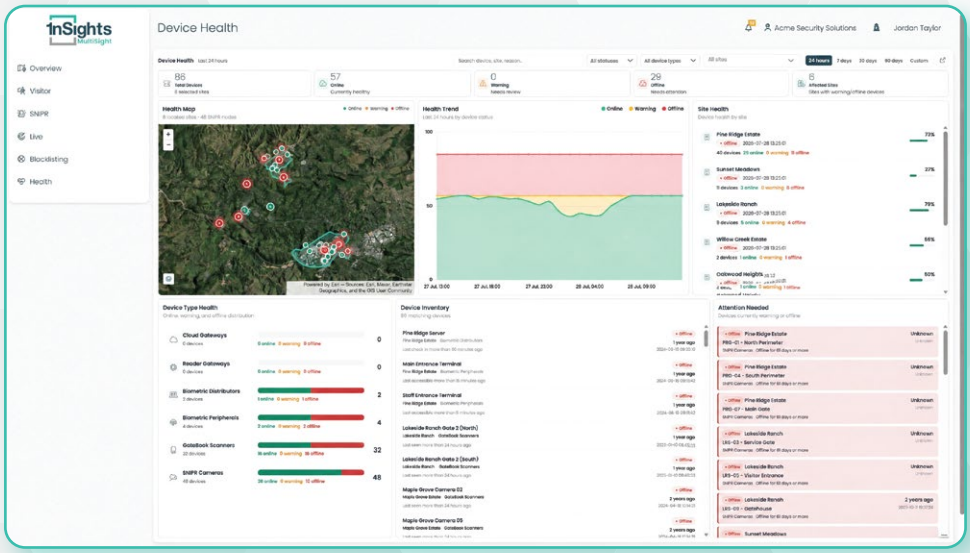

Manage people and vehicle watchlists across every site from one place. See multi-site listings, track new additions, and act quickly when a known risk appears at any location.

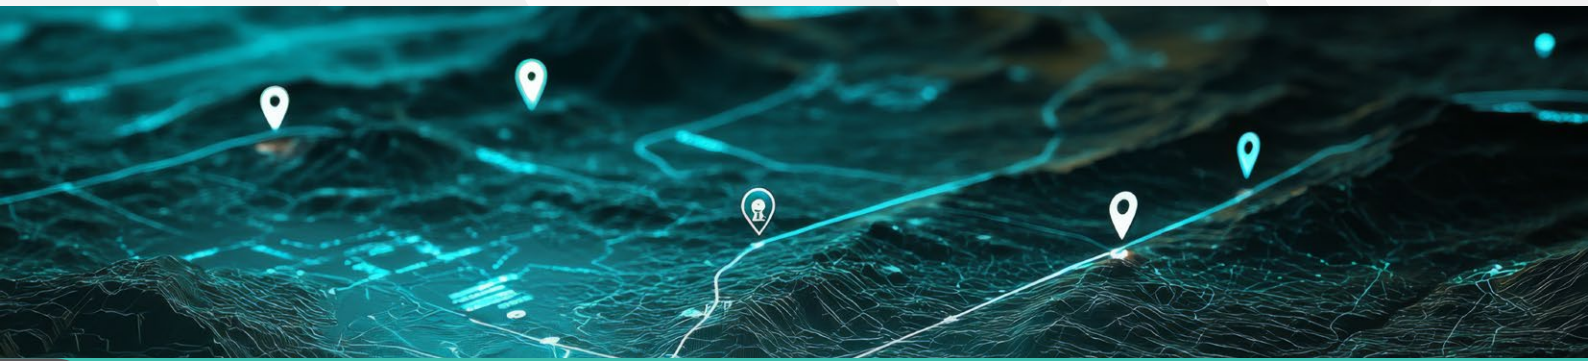

- Add, update or remove people and vehicles across multiple sites
- Clear visibility of multi-site watchlist records and recent listings
- Searchable records with reason breakdown and site coverage

Device Health

Monitor the health of cameras and devices across your entire portfolio. Quickly identify offline or warning devices, understand which sites are affected, and prioritise attention where it is needed most.

- Clear view of Online, Warning and Offline devices across all of your sites
- Health Map and site-level summaries for fast triage
- Device inventory with status history and on-screen troubleshooting

Smarter Insights. Safer Sites.

1nSights transforms how you manage your sites by turning the data from your existing systems into clear, actionable intelligence. No more switching between platforms or guessing what is happening. You now have real-time visibility, deeper visitor understanding, and predictive insight in one place.

1nSights

Move from reactive to proactive security and operations

Reduce risk through early detection of anomalies and threats

Make faster, better-informed decisions with complete oversight

Maximise the value of your current OneSpace investment

1nSights

Give your team the clarity and confidence needed to protect what matters most.
