OneSpace

Alliance Against Construction Extortion

OneSpace delivers unified security and oversight across your dispersed construction sites, directly countering extortion, invasions, and repeat offenders who exploit disconnected projects. Gain real-time visibility and control through **OneSpace Central**, rapid incident logging with photo evidence, seamless site-to-site blacklisting, and instant alerts to stop threats moving **between locations**.

Protect workers, equipment, and project timelines with tools that deter criminals and maintain secure, efficient operations across all your sites. Reducing downtime, improving response times, and helping you stay ahead of threats before they escalate.

Join the **fight against extortion** in the **construction industry** with **OneSpace**.

PURPOSE-BUILT TECHNOLOGY

OneSpace integrates proven solutions including **SNIPR** devices, **OneAccess** gateways, **GateBook** for visitor control, **OneSpace Central**, and **Connect app** to secure perimeters, monitor equipment, and detect intrusions instantly.

ENGINEERED FOR CONSTRUCTION

OneSpace is built specifically for demanding construction environments.

It delivers dependable performance with minimal maintenance, helping teams stay focused on the project — not the system.

CONNECTED SITE INTELLIGENCE

OneSpace connects all your sites into one intelligent system. Real-time visibility, instant alerts, and shared intelligence across locations help you detect threats early and respond faster — whether you're on one site or managing many.

Setting Up Construction Company Sites

Managing multiple construction sites is complex, time-consuming, and exposes projects to extortion and organised threats. OneSpace simplifies secure oversight, giving you control and visibility across every location without added hassle.

From OneSpace you can manage and monitor:

1. Erfs and Properties
2. Ownership and Access
3. Geotagged Incidents with Images
4. Panic buttons
5. Vehicle licence plate recognition
6. TrailCams and AI Object Recognition.

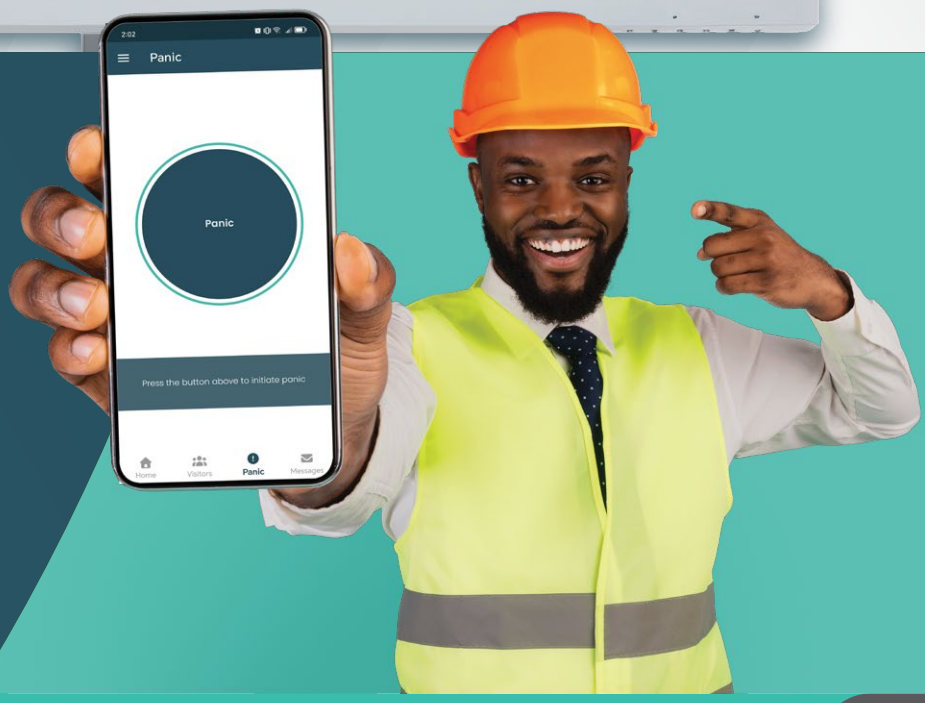

This **seamless approach** gives construction teams **peace of mind**, enabling rapid responses to **extortion** and **threats** while preventing repeat **offenders** from moving between sites. Access your world through **OneSpace Central** or **OneSpace Connect app** to simplify oversight and enhance safety.

Connect Panic

The **OneSpace Connect app**'s panic button delivers immediate peace of mind for workers and supervisors on site. Geotagging triggers **rapid**, **location-specific** alerts and responses.

Custom on-site procedures ensure the right actions are taken quickly, all within one secure app that protects people and projects nationally.

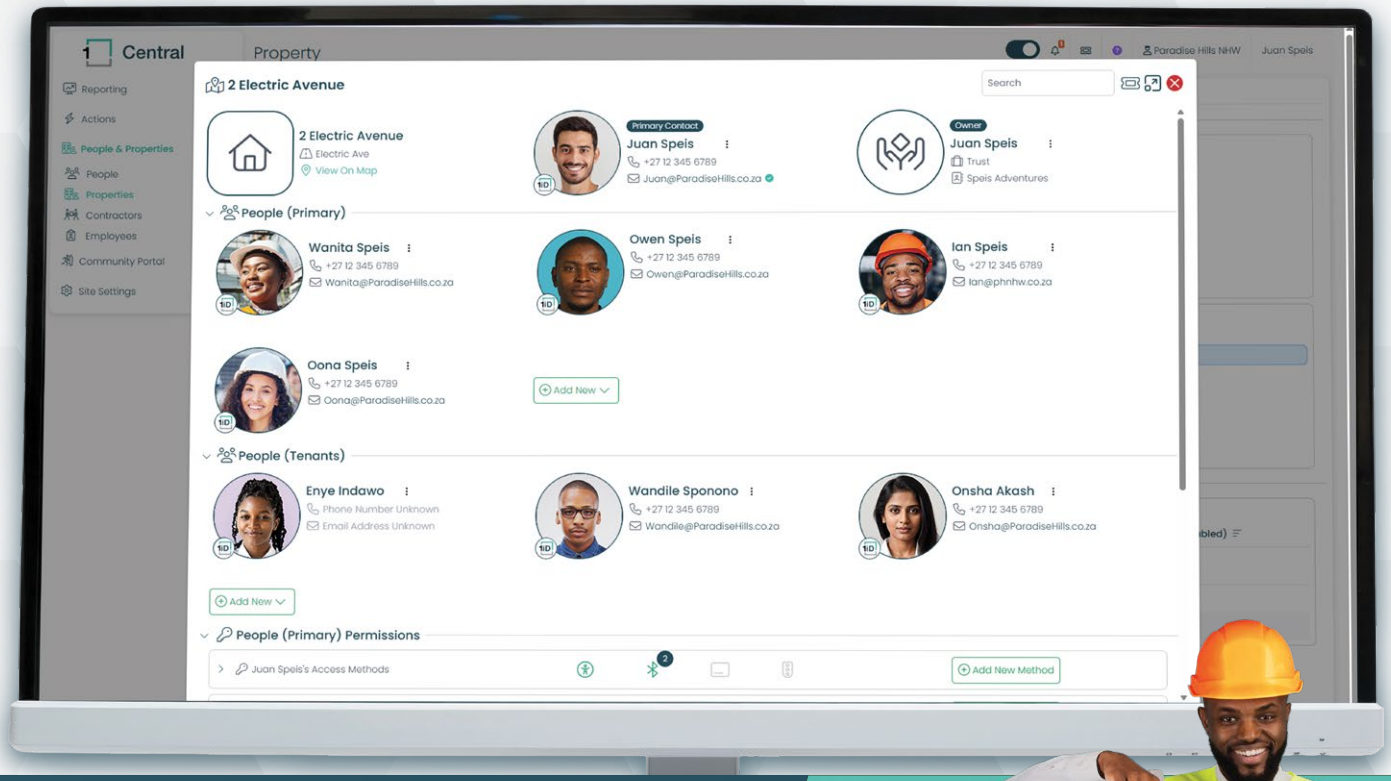

Site Oversight Simplified

With **OneSpace Central**, gain peace of mind through easy access to **comprehensive** site details. Simply click on a project to view any assigned people, complete with **contact information** for swift communication and verification.

This **secure overview** empowers site managers and security teams to monitor personnel effectively, identify repeat threats **across locations**, and enable rapid responses to extortion attempts or intrusions. Review **access methods** and **rights** for each individual, plus valuable insights on **Access Control** and **Visitor Management**, allowing you to maintain control and enhance site safety without complexity.

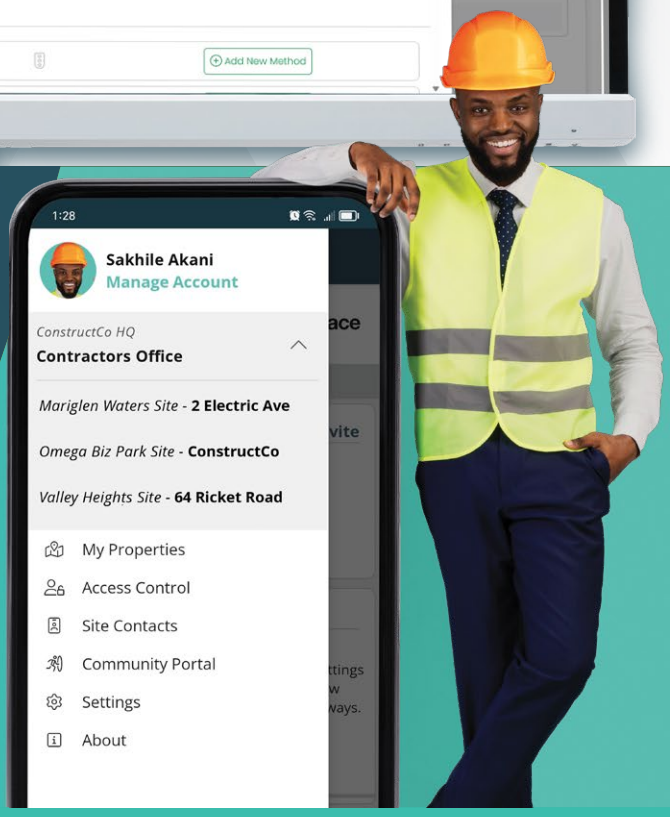

Imagine the confidence from **clear visibility** of **who** is on which site, **when**, and **how** they access restricted areas, streamlining oversight to build trust, reduce risks, and **protect your projects**.

1 Connect

OneSpace links users to multiple **Sites** via **OneSpace Connect**, sparing managers data duplication and offering **secure**, **easy oversight** for project efficiency.

With **1iD**, a unique digital identity, personnel simply manage their access across sites using **OneSpace Connect**, ensuring **convenient**, **secure control** through **one profile**.

Access Control with OneAccess

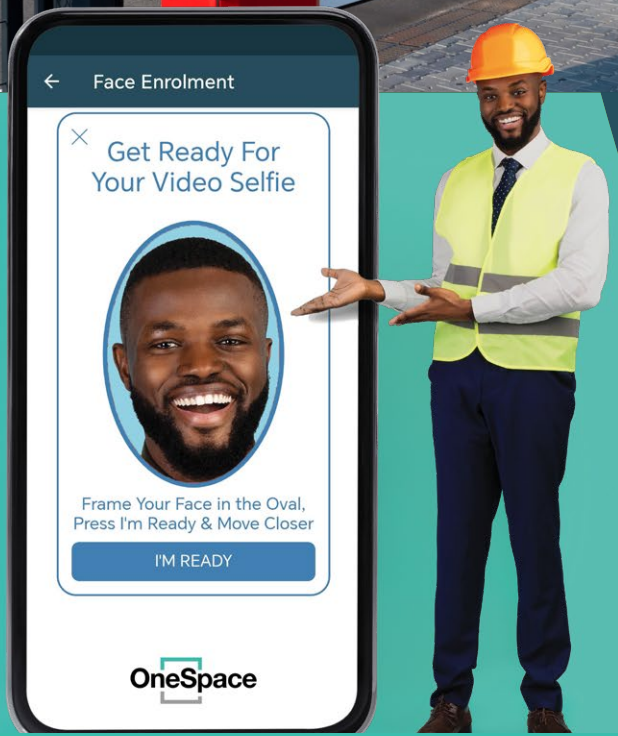

Transform your construction sites into **secure**, **controlled** environments with **OneAccess**, delivering peace of mind by **preventing unauthorised entry** and **deterring extortion** threats. Ensure safe, verified access for workers, contractors, and authorised visitors using **Bluetooth®**, **key cards**, **biometrics**, and more, providing robust protection against intrusions across dispersed projects.

OneSpace Central administers this setup, allowing managers to monitor permissions, access logs, and visitor schedules with quick, easy control. Streamline security to meet each site's unique demands while keeping operations smooth and efficient.

Our proprietary **kit boxes**, built on modern tech standards, enable simple installation and reliable performance even in challenging construction conditions. Elevate protection with **OneAccess**, delivering a seamless experience that builds trust, safeguards assets and personnel, and maintains project momentum.

1 Connect

OneSpace Connect App offers secure **Bluetooth® access** for authorised personnel. **Request** or view **active methods** with **easy control**.

Scan face biometrics for rapid entry, ensuring peace of mind. Enhance estate safety with **seamless authentication**.

Visitor Management with OneAccess

Welcome **authorised** visitors and contractors effortlessly at your construction sites with **OneAccess**. This system delivers peace of mind through **simple, secure handling**, allowing supervisors to approve suppliers, deliveries, and temporary workers without delays.

Managers track **arrivals and departures** with **instant updates**, blocking repeat threats and ensuring safety. **OneAccess** keeps operations smooth and controlled.

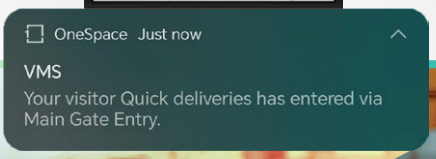

Strengthen project security with **real-time coordination** tailored to site needs. Enjoy secure sites where **protection** and **productivity thrive**.

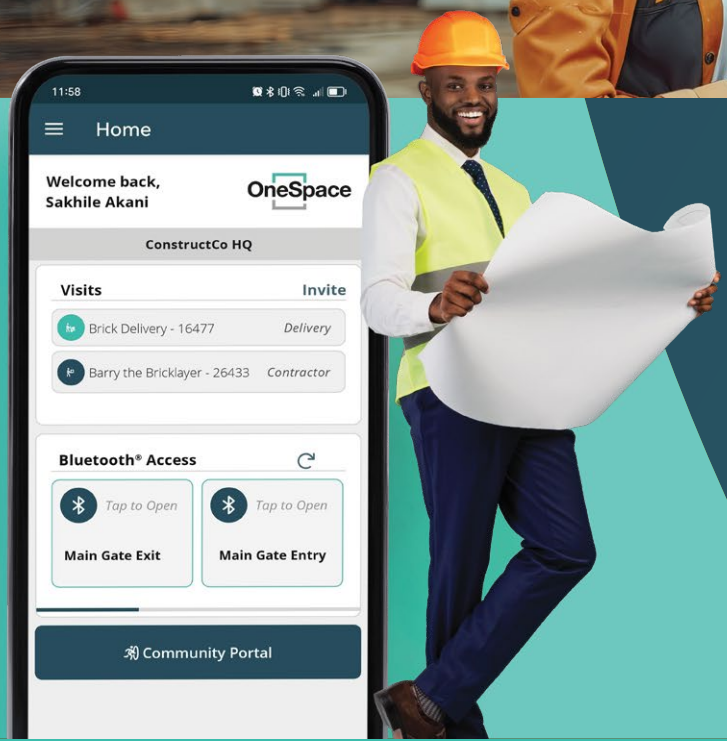

1 Connect

OneSpace Connect App simplifies visitor management. Create Visitor PINs, send as images for face readers, and easily control access.

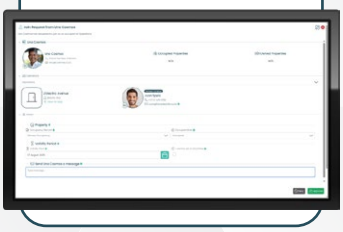

View, cancel visits with secure, auditable oversight. Boost site efficiency with rapid, reliable visitor coordination.

Connect App Communication

OneSpace Connect brings peace of mind to construction teams through easy, secure communication tools that keep sites **informed and responsive**. Access vital updates, guest alerts, and **incident reporting** directly on your mobile, fostering rapid coordination across projects and stronger awareness among personnel for **enhanced safety** and **operational resilience**.

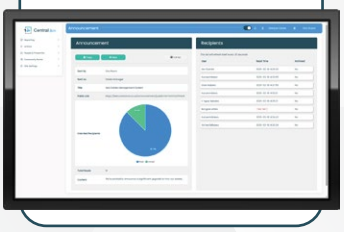

Direct Messaging

Sent by site managers from **OneSpace Central**

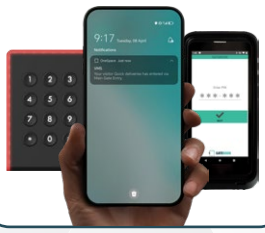

Announcements

Site-wide and **targeted** by site managers from **OneSpace Central**

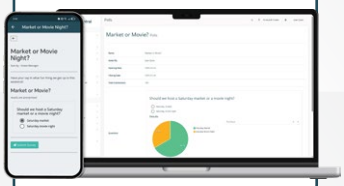

Notifications

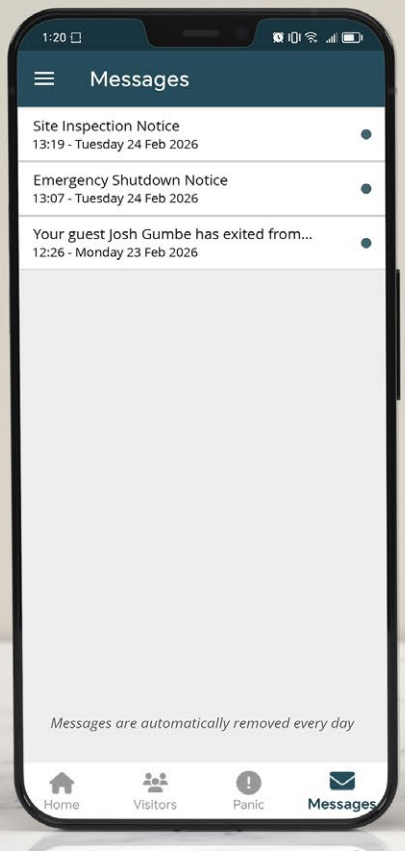

Notifications of user-generated **PINs being used** from **OneAccess**

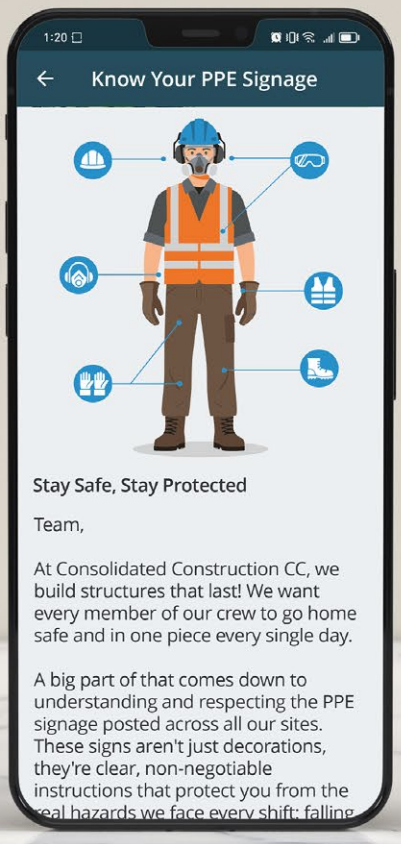

Surveys & Polls

Sent as **broadcasts** or **targeted** from **OneSpace Central**

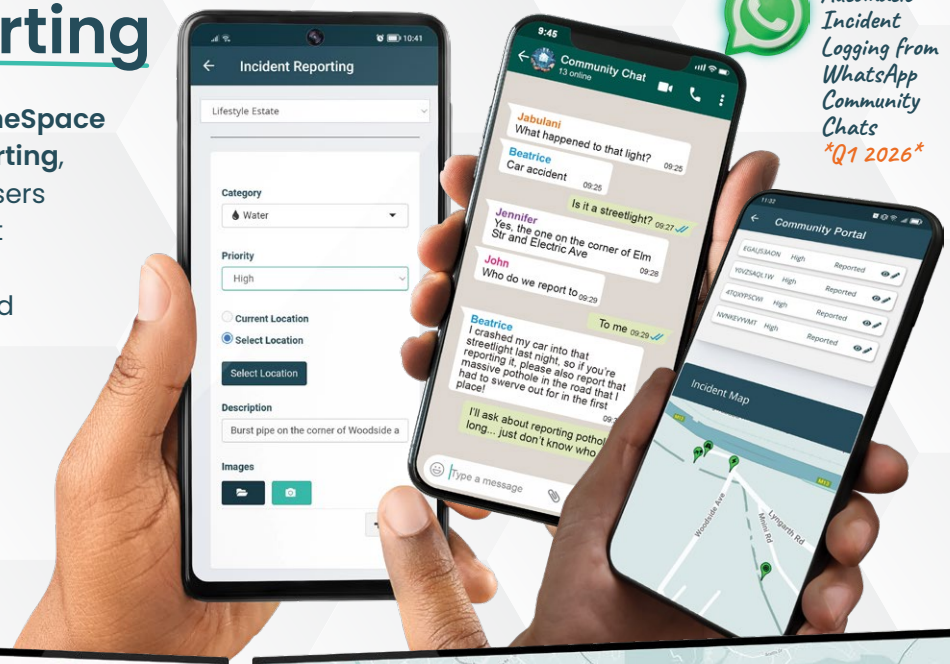

Incident Reporting

Experience peace of mind with **OneSpace Connect**'s effective **incident reporting**, designed for construction sites. Users **map and geotag incidents**, select **categories** and **severity ratings**, attach **images**, and share detailed reports instantly, enabling secure communication that drives rapid site responses.

*Automatic Incident Logging from WhatsApp Community Chats *Q1 2026**

Connect

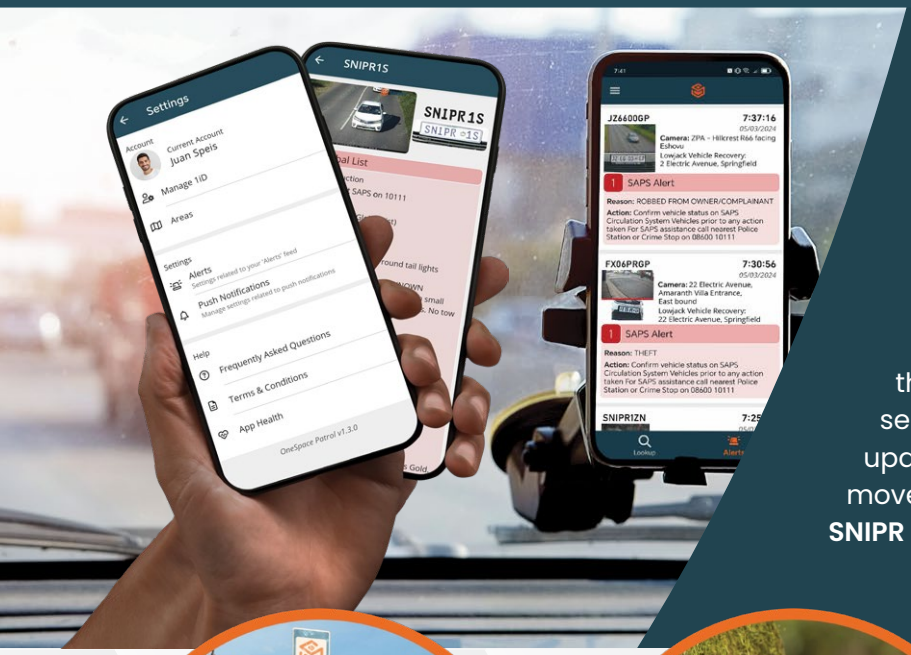

Central

Incident Management

In **OneSpace Central**, managers curate, filter, and close reports efficiently, attach **external references**, and **respond directly** to personnel from the incident screen. This seamless process empowers construction teams to resolve issues **swiftly**, fostering **trust** and **unity** while **enhancing overall site safety**.

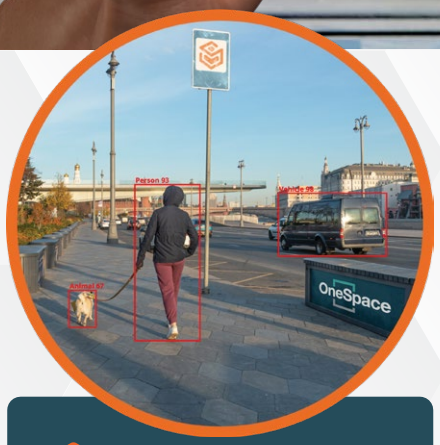

Experience the confidence from comprehensive tracking that turns reports into resolutions, reducing risks and maintaining project momentum.

OneSpace Patrol

Stay mission-ready with **OneSpace Patrol**, the app delivering instant alerts to your security provider with seamless field updates. Access critical information on the move, ensuring rapid response when the your **SNIPR** devices alert on anything.

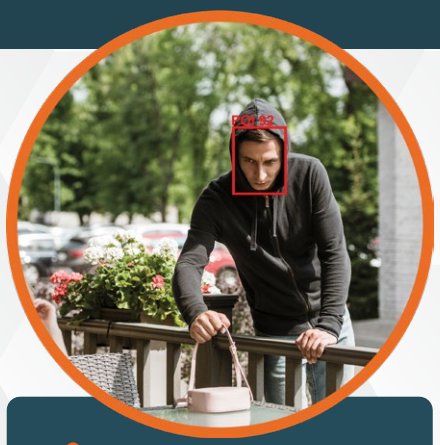

SNIPR™ Spotter

Enhances surveillance with **image-based object recognition** for **real-time alerts**.

SNIPR™ TrailCam

Enhances trailcams with **SNIPR Spotter**'s **image-based object recognition** and **alerts**.

SNIPR™ of Faces

Detects **hotlisted faces** via **cameras**, generating **alerts** on the **SNIPR system.**

SNIPR.online

Take command with **SNIPR.Online**, your centralized dashboard for **real-time alerts** and **tactical intel**, designed to **streamline control room operations**. Stay ahead with a clear overview of all **SNIPR** solutions, built for **rapid decision-making**, **mission optimization**, and **strategic oversight** across diverse operational zones.
